TESTING VERSION · BUILD 4

Lango App

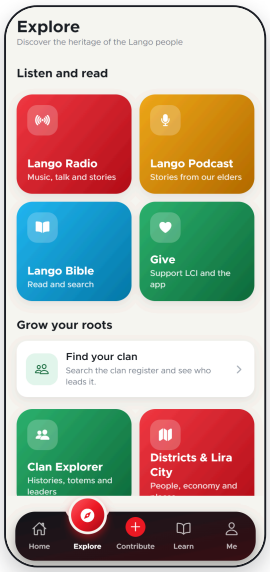

Won Nyaci me Lango · the Lango Cultural Institution in your pocket

Android · version 1.0.0
30 October 2026
by Kakebe Technologies

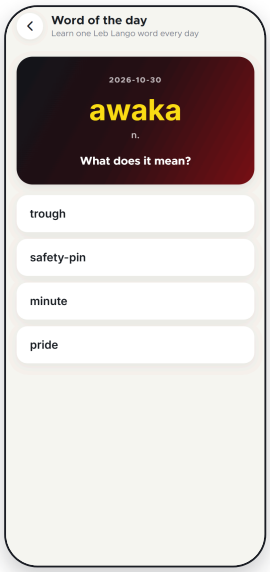

The Lango App brings the Lango Cultural Institution (LCI) to your phone: learn Leb Lango, explore clans, districts and history, add what you know to the heritage archive, listen to Lango radio and the stories of our elders, read the Lango Bible and support the work. This sheet is for the people testing the first Android version.

Word of the day
A ten-second quiz

Dictionary
Leb Lango and English

Translator
Words and short phrases

Install and connect

1. **Install.** Open the APK file on your Android phone and allow "install unknown apps" for the app you opened it from.
2. **Use the test Wi-Fi.** Join the same Wi-Fi as the test computer, which must be running XAMPP (Apache and MySQL). Mobile data cannot reach it.
3. **Open Lango App.** Browsing needs no account. If a screen says "No internet connection", tap **Change server address**, type the address below and tap Save.
4. **Create an account** when you want to contribute, join your clan group or play the weekly challenge.

ADDRESS BUILT INTO THIS VERSION
192.168.1.4/langoculturalinstitution

If the computer's address changes, enter the new one the same way (or Me → Settings → tap the version line five times).

Good to know about this test

- It talks to a **test computer**, not the live website, so the phone must be on the same Wi-Fi.
- **Sample data is expected:** sample members, clans marked "Awaiting verification" and empty sections.
- **Radio, Podcast and Bible** stay empty until LCI adds recordings and Bible text it has permission to publish.
- **Giving** records a pledge and a reference. No real payment is taken yet.
- **Google sign-in** and Android push messages are switched off for now.
- **Leb Lango** appears only where LCI's language experts have entered it; the rest stays in English.
- Android only. iPhone is not part of this round.

What is in this version

Learn
Dictionary of about 2,800 words (offline once downloaded), translator, proverbs, phrasebook.

Every day
Word of the day quiz, streaks, the weekly Language Challenge and leaderboards.

Explore
Clans, districts and Lira City, notable Langos, history, heritage, biodiversity, library, news, events.

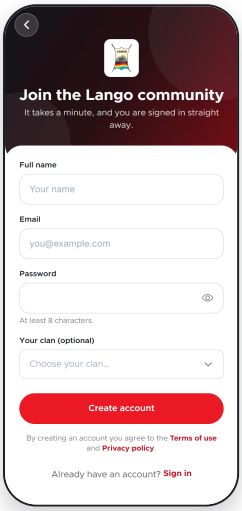

Contribute
Add words, proverbs, stories, nature records, documents and sites with photo, audio or video. Works offline; LCI reviews every entry.

Clan group
Join your clan's group: see who is in it, write to each other, browse its contributions.

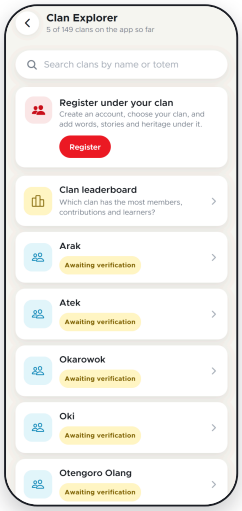

Listen and read
Lango Radio, Lango Podcast (elders' stories) and the Lango Bible. Plays on with the screen off.

Give
Pledge a gift to LCI or to keeping the app running; see how to pay.

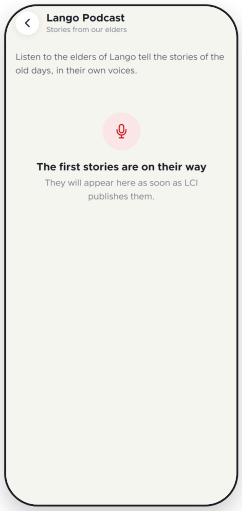

Settings
English or Leb Lango, offline dictionary, daily reminder, connection check.

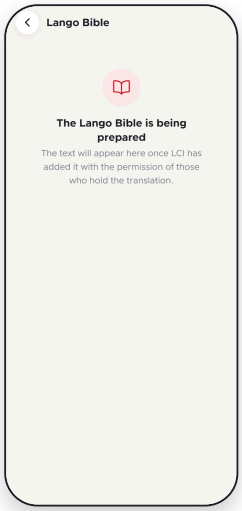

Create an account
Name, email, password

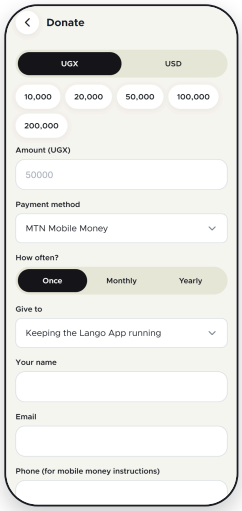

Clan Explorer
Find and join your clan

Lango Podcast
Fills as LCI adds stories

Lango Bible
Ready for permitted text

Give
For LCI or the app

What to test

1. **First start:** the introduction and the language choice.
2. **Browse without an account:** Home, Explore, search the dictionary (try "rwom", and type letters such as ɛ ɔ ŋ) and use the translator.
3. **Create an account** with name, email and password, skip the clan, then sign out and sign in again.
4. **Contribute** a word or proverb, with a photo or a recording, and follow it under My contributions.
5. **Word of the day** and the weekly challenge: answer, check your streak and the leaderboard.
6. **Find your clan,** join its group and write a message.
7. **Settings:** switch to Leb Lango, download the offline dictionary, then search with airplane mode on.
8. **Listen and read:** open Radio, Podcast and Bible. Expect "getting ready" until LCI adds content; if there is some, play it and lock the screen.
9. **Give:** record a pledge for the app and check the reference and how-to-pay text.
10. **Look for trouble:** text cut off, slow screens, wrong words, buttons that do nothing, anything confusing.

Send us your findings

For each problem tell us **what you tapped, what you expected and what happened**, your phone model and Android version, and add a screenshot if you can.
