EXECUTIVE **SUMMARY**

The Lango Cultural Foundation holds a heritage older than any archive: the Leb Lango language, well over a hundred clans, and the stories, songs and proverbs of nine districts and Lira City. Much of it still lives in elders' memories and WhatsApp groups, while a phone-first generation looks for its culture on a screen.

Kakebe Technologies proposes **one digital platform** to keep it, teach it and share it: a **public website**, an **admin control panel** and a **mobile app for Android and iOS**, all built on one backend and one review queue.

> **Development is already under way.** A build from scratch would take about five months. From where we have reached, we can complete and launch the website, the admin panel and both apps in **two months**.

What the Foundation gets

- A trusted public record of the language, clans, districts and heritage, with sources shown
- A Language Hub: dictionary, translator, proverbs and lessons, online and offline
- A contribution engine for words, stories and sites, captured by voice, photo and GPS, even offline
- Admin tools that the Foundation's own staff run, with roles and expert review
- Android and iOS apps, plus an installable web app
- Training, handover and 90 days of included support

> “We are not starting from zero. We are finishing.

UNDERSTANDING **YOUR NEEDS**

The Lango live in nine districts and Lira City, more than two million people at the 2024 census. The Foundation carries their identity under the Won Nyaci, so its platform must hold knowledge in trust, show where every fact came from, and leave authority with the people the community recognises.

What must be solved	How the platform responds
Knowledge held by elders, not on paper	Guided recording of stories, words and sites with voice, photo and GPS, reviewed before publishing
Fading use of Leb Lango among youth	Dictionary, translator, proverbs and lessons that work offline on a phone
A scattered community and costly data	A website for reach, an app for daily use, offline-first design
Trust in what is published	Sources shown, trust labels, expert review, nothing invented
Limited IT capacity	A no-code admin, staff training and a support plan

OUR PRINCIPLES

Community authority
The Foundation decides what is true

Offline first
Built for the weakest connection

Plain language
Simple for first-time smartphone users

Own your data
Exportable at any time

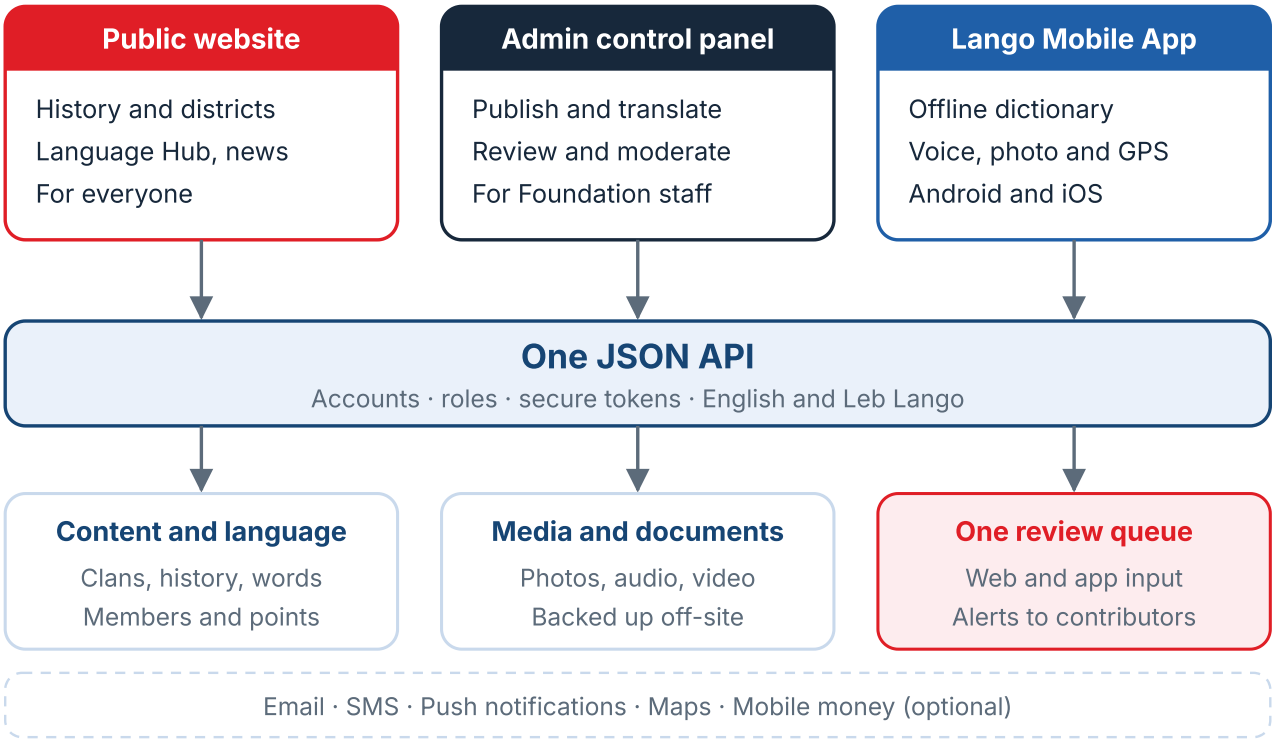

SEVEN OBJECTIVES

Preserve · Teach · Connect · Represent · Sustain · Include · Govern

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

ONE PLATFORM, **THREE SURFACES**

Every surface talks to the same API, database and review queue. A word suggested on a phone in Aduku and one suggested on a laptop in London appear in the same moderation screen, and once an expert approves it, it is live on the website and in the app at the same time.

One platform: website, admin panel and mobile app share one API, one database and one review queue.

- **Website** for reach, credibility and search
- **Admin control panel** for publishing, review and reporting
- **Mobile app** for daily learning and for recording in the field, offline

Built together, the three cost far less than built one after the other, and nothing is built twice.

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

THE PUBLIC **WEBSITE**

Fast, bilingual and designed for phones first. It carries the Foundation's own identity and switches between English and Leb Lango in one tap.

- Home, About and Leadership
- History: ten chapters, timeline, sources
- Districts and Lira City atlas with map
- Clan Explorer: a page per clan
- Notable Langos
- Heritage: ceremonies, crafts, music, sites
- Biodiversity register
- News, events with tickets, programmes
- Library: documents, audio and video
- Giving, volunteering and diaspora forms

Language Hub

- Dictionary with plain-keyboard search (type e to find ɛ)
- Translator built on the dictionary, not machine translation
- Proverbs, greetings and lessons
- Suggest a word: reviewed by experts before it goes live
- Cultural Assistant: answers only from reviewed content, with sources

Visitors can contribute. A word, proverb, oral history, observation or heritage site, with GPS, photos and audio, and a tracking code to follow it.

WCAG 2.1 AA
accessibility target

Mobile first
plus a lite mode for slow data

2 languages
English and Leb Lango

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

ADMIN **CONTROL PANEL**

Built for the Foundation's staff and volunteers, not for developers. Every change is recorded and reversible.

Role	Can do
Admin	Everything, including users, settings and backups
Editor	Publish news, pages, history, heritage and events
Moderator	Review contributions, words, comments and messages
Clan leader	Edit their own clan only; changes are reviewed

- 30 content types and a Translations screen for the Leb Lango interface, entered by experts
- Notification bell, dashboard, export, backup, version history and a full audit log

HOW A CONTRIBUTION IS REVIEWED

1. **Capture** on the website or app, even offline
2. **Submit** a tracking code is issued at once
3. **Review** a moderator reads, edits and decides
4. **Specialist check** clan leader or review panel, where needed
5. **Publish** with contributor and source recorded
6. **Notify** in-app and push, with points and badges

> **The platform never invents culture.** Content comes only from the Foundation, published sources shown on the page, or contributions a reviewer has approved.

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

MOBILE APP **ANDROID AND IOS**

One app for the whole platform: Android on Google Play, iOS on the App Store, and an installable web app for anyone without a store.

- Offline dictionary and translator
- Seven guided forms: observation, natural heritage, word, proverb, oral history, document, heritage site
- Record by voice, photo and GPS, even with no signal
- Contributions queue on the phone and send once, never duplicated
- Track every contribution; push notification when reviewed
- Points, Bronze to Platinum levels and badges
- Explore clans, districts, history, heritage and events
- English and Leb Lango interface

OFFLINE FIRST

1. **Record** story, photo and GPS, with no signal
2. **Save** on the phone with a unique reference
3. **Send** automatically when connected
4. **Stored once** duplicates are ignored

Publishing

- Google Play for Android and the App Store for iOS
- Submitted from the Foundation's own store accounts
- One codebase (Expo and React Native) keeps both apps in step

> **One codebase, two stores.** Android and iOS releases are built and tested together, so every member gets the same features on any phone.

After launch: SMS and USSD fallback, one-time-code sign-in, clan groups and live mobile-money payments.

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

HOSTING, SECURITY **AND PRIVACY**

Hosting

- On the hosting platform of the Foundation's choice: any reputable cloud, VPS or local provider
- Accounts, domain and store listings in the Foundation's own name
- Staging and production environments, HTTPS everywhere
- Daily off-site backups and a restore drill before launch

SECURITY

- Hashed passwords
- API tokens stored only as hashes
- Six roles with scoped permissions
- Rate limits on sign-in and uploads
- Duplicate-safe uploads
- Audit log and version history
- Forced password change at first sign-in
- Penetration test before launch (OWASP Top 10)

DATA PROTECTION: UGANDA DATA PROTECTION AND PRIVACY ACT, 2019

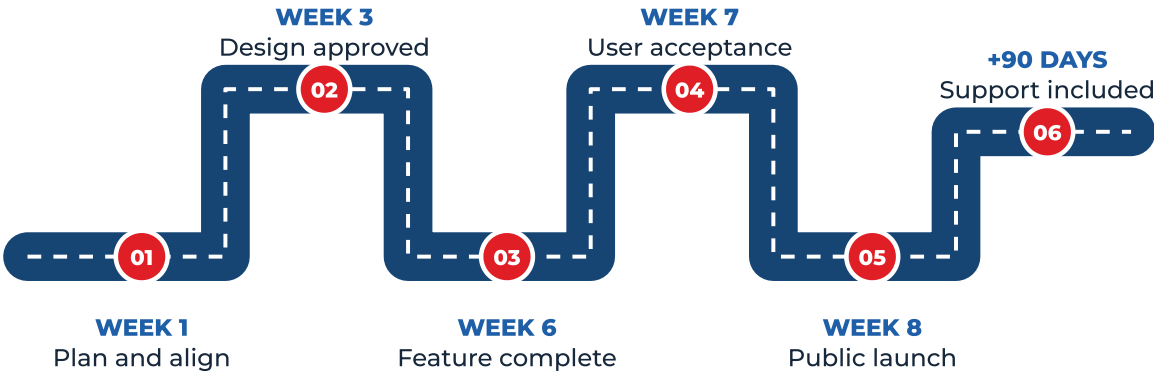

- Plain-language consent and a privacy notice in English and Leb Lango
- Only the data needed; phone, country and clan are optional
- Members can view, correct and delete their data
- A retention schedule and a named data protection focal person
- Clear rules for children's content and consent for recorded elders

PHP 8.2 website and admin	**MySQL** one database	**React Native** Android and iOS	**JSON API** shared by all

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

DELIVERY IN **TWO MONTHS**

Development has already started. A full build would take about five months; from our current position we complete and launch everything in **eight weeks**, then support it for 90 days.

Two-month plan with five milestones and 90 days of support.

Phase	Weeks	What happens
Plan and align	1	Kick-off, content audit, scope and brand assets confirmed
Design and model	1 to 3	Brand and interface design, clickable prototype, data model
Build and complete	2 to 6	Website, admin, language and community modules; Android and iOS apps
Content, test, train	5 to 7	Content loaded and verified; testing; pilot; staff training
Launch	7 to 8	Store submissions, go-live, launch communications

What keeps it to two months: the working platform, a named Foundation coordinator in week 1, reviews within five working days, and an agreed launch content set.

OUR **TEAM**

Sedrick Otolo
Director

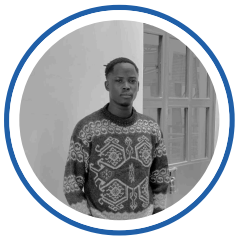

Patrick Okello
Chief Technology Officer

Oscar Jerome Okello
Web Development Lead

Komakech Moses
Sales and Marketing

Bodo Desderio
SEO Engineer

Supported by dedicated mobile developers, a product designer, a QA engineer and supervised interns from our Digital Bridge Internship Programme.

Working with you

- A weekly 30-minute call with a one-page status report
- A demonstration every two weeks on a private staging site
- One Foundation coordinator, with named language and heritage panels
- Sign-off at four gates: scope, design, acceptance and go-live

On the Foundation side	Role
Executive sponsor	Approves milestones and resolves escalations
Project coordinator	Decisions, feedback and sign-off, about four hours a week
Language and heritage panels	Review Leb Lango wording, history and clan content
Communications officer	Brand assets and news; becomes the lead editor

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

TRAINING, HANDOVER **AND SUPPORT**

Who	Training
Administrators	One day, hands-on, in Lira: users, roles, settings, backups
Editors and communications	One day: news, pages, events, media, translations
Moderators and language experts	One day: the review queue, dictionary and proverbs
Clan leaders and youth ambassadors	Half a day each, in English and Leb Lango

At handover

- Access to hosting, domain, database and store accounts, in the Foundation's name
- Technical and user documentation, an admin manual and short videos
- A content inventory with the source of every loaded fact
- A maintenance runbook

AFTER LAUNCH

- **90 days of hypercare, included:** daily monitoring, rapid fixes, usage reviews at 30, 60 and 90 days
- **Then a support plan** (Essential, Standard or Premium): uptime monitoring, security updates, backups, defect fixes, app-store updates, quarterly review
- **No lock-in:** the Foundation owns its content, data and accounts and can export everything at any time

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

ABOUT **KAKEBE**

Kakebe Technologies Limited is a youth-led technology company in Lira City, in the heart of Lango. We build software, AI and robotics for real local problems, and train young people to build the next ones.

5+ years in Lira City	**257** youth graduated Tech Camp 2025	**6** service lines	**20+** platforms delivered

OUR PROGRAMMES

- **Kakebe Tech Camp:** residential bootcamp for ages 13 to 30; next camp 14 to 23 December 2026
- **Digital Bridge Internship Programme** and the **Innovation Programme**, home of the Lango Innovation Challenge

WHY KAKEBE

- **We are local:** workshops with elders and clan leaders happen in person, in Lira
- **We have already built it:** the working platform exists today
- **Proven delivery:** content-managed sites, mobile apps on a shared API, offline-first design, mobile-money payments
- **We build capacity:** staff trained, documentation complete, content and data yours
- **A public partner:** BetterLife International announced its partnership with Kakebe on 20 October 2026

> **Built in Lira. Built for Lango.**

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

OUR **EXPERIENCE**

Project	What we built	Why it matters
Lango cultural platform	Website, admin, API and mobile app, working end to end	The complete solution, already built
A Better Life International betterlifeint.org	Redesigned site with farm shop, card and mobile-money checkout, full admin, blog and press hub	A foundation site run by non-technical staff
Betty Amongi Foundation	Foundation website, CMS and a mentorship portal	Serves the same Lango community
Civic Coded civiccoded.com	Civic-education platform: citizens ask about rights, laws and bills and get sourced answers saved as lessons	Sourced answers, like our Cultural Assistant
OPM Schedules	Scheduling for ministry offices: reminders and a weekly PDF programme	Government-grade roles and isolation
iRecover	Lost-documents recovery with matching, mobile-money fees and tracking codes	Review workflow with tracking codes
BodaERP	Rider registry and fee platform across five roles, from riders to government	A large registry like the clan register

ALSO DELIVERED

- ObiFunds: crowdfunding
- ObiTickets: QR event ticketing
- ChamaFunds: community fundraising
- Kakebe Tech Camp platform
- KPOS: point of sale
- Falcon ERP: export operations
- Mwonya Streams: culture streaming
- Kakebe Shop Online
- Oroma TV: news and live streams
- Innovate2Day: innovation hub
- NUFA and NUFA Awards
- Mighty Rides: portals and accounting

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

EXPERIENCE, **CONTINUED**

Project	What we built	Why it matters
FaithFellows	Church platform: web and Expo app on one API; English, Luo, Luganda, Swahili	The app architecture, in production
Soila	AI app that helps farmers test soil	AI on mobile for rural users
Better Life Farmers Connect	Mobile application for farmers	Farmer-facing mobile experience
Lira City website	City website rebuild with CMS, tenders and citizen issue reports	A public institution in Lira
SignConnect Uganda	Sign-language learning: tagged videos, lessons and classes	The closest cousin to the Language Hub

WHAT THE FOUNDATION NEEDS, AND WHERE WE DELIVERED IT

Need	Delivered in
No-code content management	A Better Life International, Betty Amongi Foundation, Lira City website
Multi-role access	OPM Schedules, BodaERP, iRecover, FaithFellows
App and web on one API, offline	FaithFellows, SignConnect Uganda, KPOS
Mobile money	ObiFunds, ObiTickets, iRecover, KPOS, Kakebe Tech Camp
Tracking codes	Lira City website, iRecover
Local-language interfaces	FaithFellows (Luo, Luganda, Swahili), KPOS
AI features	Civic Coded, Soila, Innovate2Day

References, and private demonstrations of confidential systems, are available on request.

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

RISKS AND **ASSUMPTIONS**

Risk	How we manage it
Content arrives late	Content audit in week 1, an agreed launch content set, bulk import, supervised interns
Slow reviews on a two-month plan	Named roles, a five-working-day review rule, fortnightly demonstrations
Low connectivity	Offline-first app, queued uploads, a lite web mode
Disputed or inaccurate content	Sources shown, trust labels, a Cultural Review Panel, nothing published without approval
App-store review delays	Store accounts set up in week 1, Android first, web app live from day one

Assumptions

- The Foundation names its coordinator and panels in week 1 and reviews within five working days
- Cultural and language content is supplied or verified by the Foundation's experts
- Not included: original content writing, professional photography, large-scale scanning, live payments, SMS and USSD, printed materials
- Content and data belong to the Foundation; custom code is licensed to it without time limit
- Financial terms are in the separate Financial Proposal

HOW WE MEASURE SUCCESS

Records in the archive | Share verified | Contributions per month | Monthly active users | App installs | Staff running it unaided

Copyright @KakebeTechnologies · Proposal for the Lango Cultural Foundation

NEXT **STEPS**

1. **Review** this proposal and the Financial Proposal
2. **Meet** a live demonstration and a 90-minute discovery workshop
3. **Agree** scope and sign the agreement
4. **Kick off** week 1 begins
5. **Launch** end of week 8
