Lango Cultural Institution

Website · Admin control panel · Lango App

Our Culture. Our People. Our Future.

Platform walkthrough

Build as of 21 October 2026

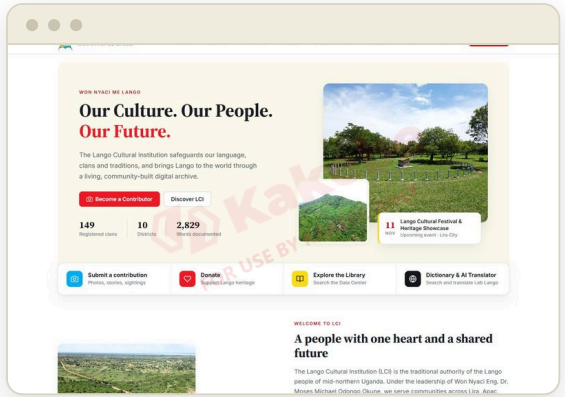

Prepared by Kakebe Technologies Limited

Confidential: for use by Kakebe Technologies Limited only

THE PLATFORM AT A GLANCE

One platform, three connected parts

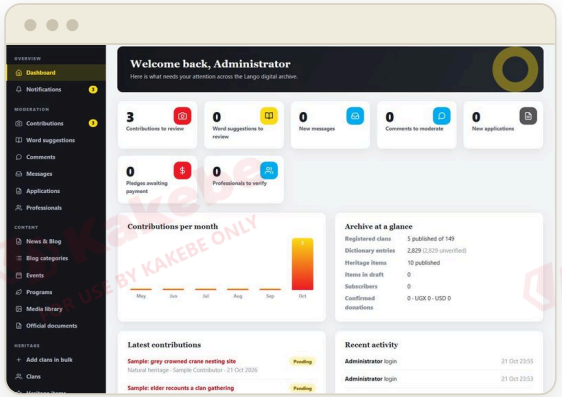

A public website, a control panel for LCI staff and a mobile app share one archive. Whatever a member contributes on the web or in the app lands in one review queue, and whatever LCI publishes appears on both.

FOR EVERYONE

Public website

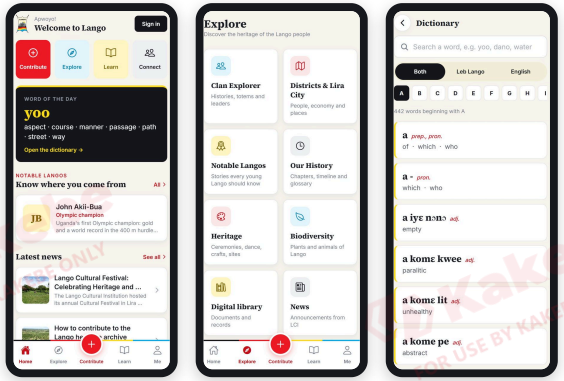

Home, history, districts, notable Langos, clans, heritage, dictionary and translator, events, programs, news, donations and the contribution form. Responsive, with an English / Leb Lango switch.

FOR LCI STAFF

Admin control panel

Role-based panel with a moderation queue, 30 content managers, dictionary and translation tools, bell notifications, version history, an audit log and database backups.

FOR MEMBERS

Lango App

Android, iOS and an installable web app, built from one codebase. Offline dictionary, contributions that queue offline and send when the connection returns, push notifications.

2,829 dictionary words

10 districts incl. Lira City

9 notable Langos

10 heritage records

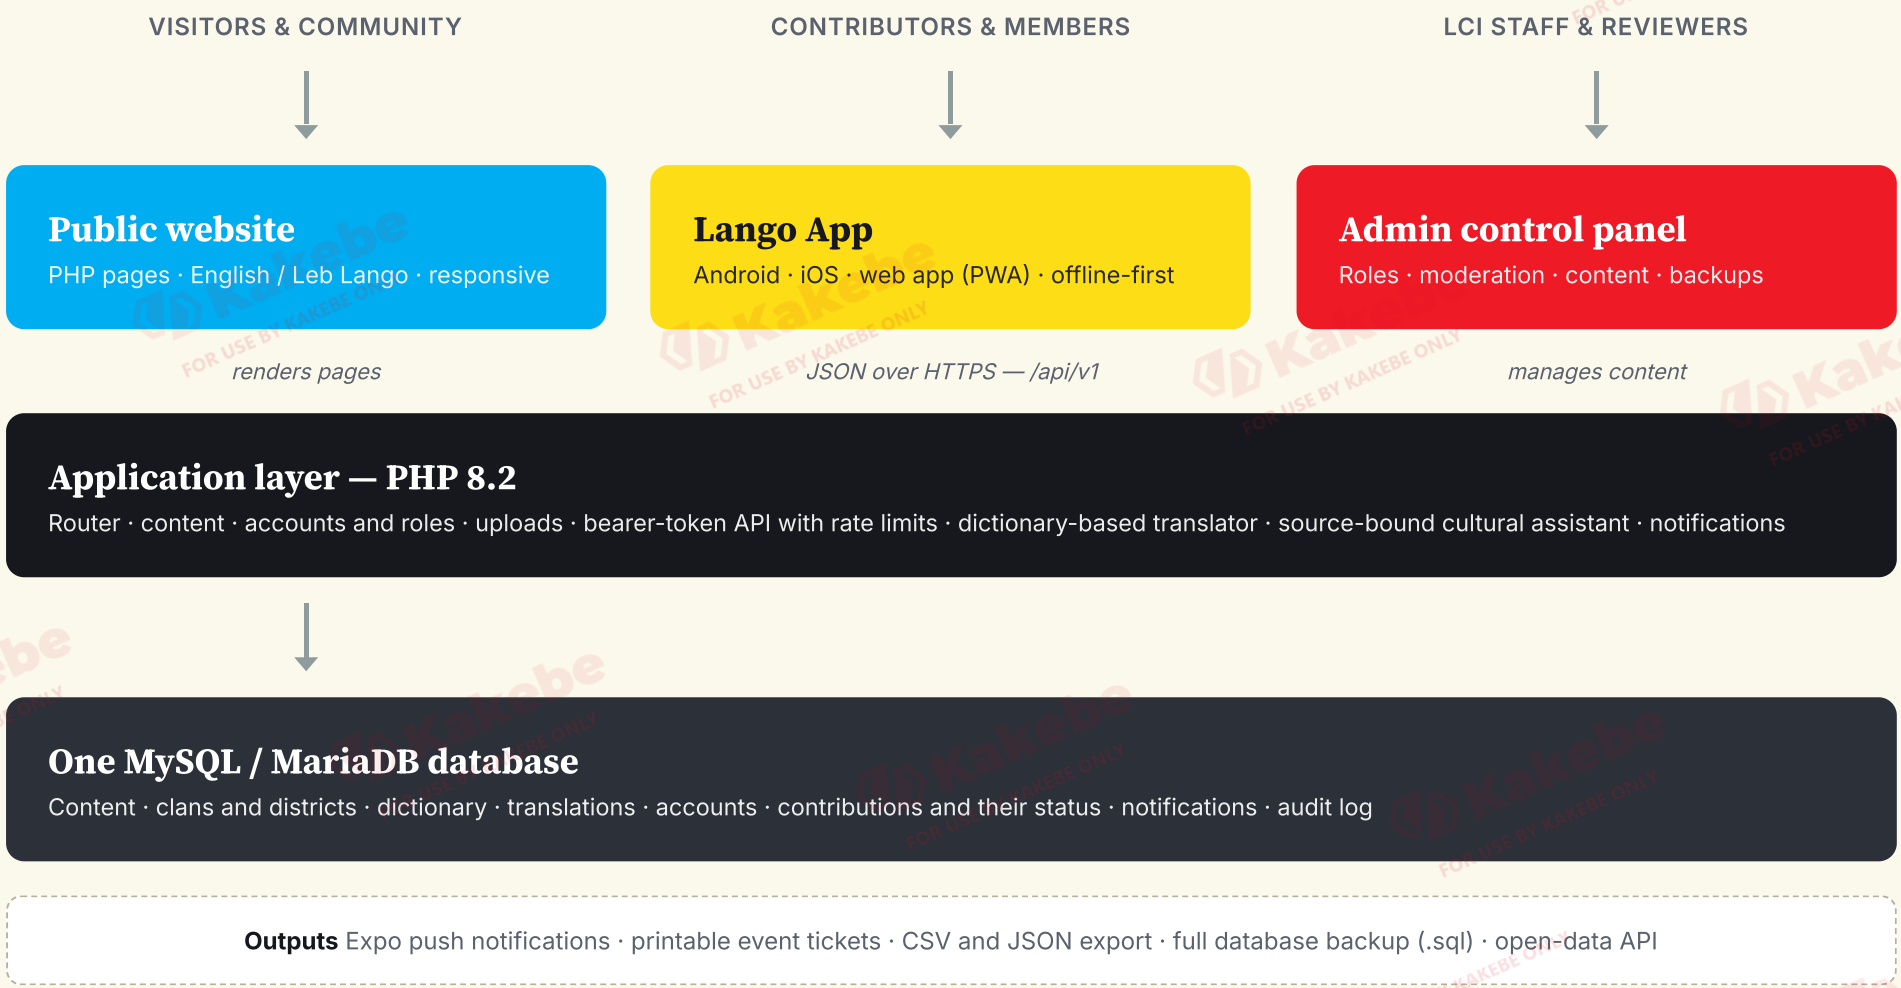

6 contribution types

40 admin screens

HOW IT FITS TOGETHER

System flow

Three front doors, one shared back end. The website and the admin panel talk to the application layer directly; the app uses the same code through a secure JSON API.

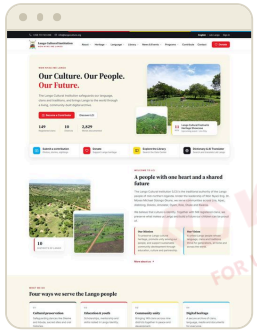

WEBSITE FLOW

A visitor's journey

From first visit to becoming a contributor or supporter, every step is one click from the last.

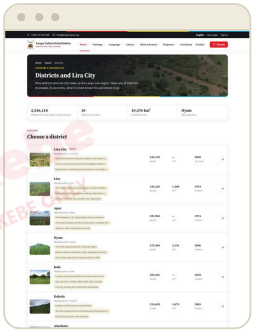

1 Discover

Hero, headline figures, word of the day, four quick actions.

HOME

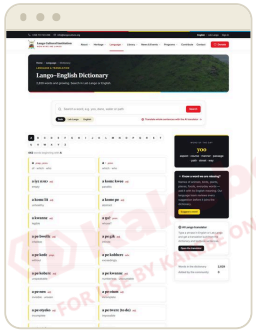

2 Explore

History, districts and Lira City, notable Langos, clans and heritage.

ABOUT · HERITAGE

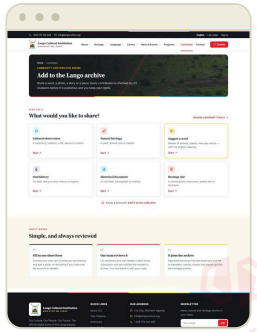

3 Learn

Search the dictionary, translate English ⇄ Leb Lango, ask the assistant.

LANGUAGE · LIBRARY

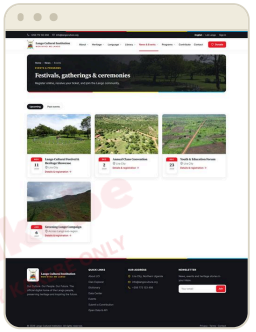

4 Contribute

One simple form, clan picker, GPS and uploads, then a tracking code.

CONTRIBUTE

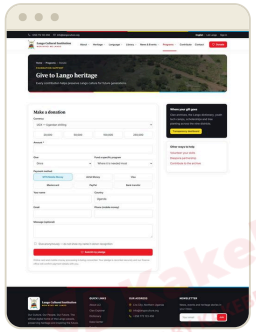

5 Connect

Events with printable tickets, programs, news, professionals.

NEWS & EVENTS · PROGRAMS

6 Support

Donation pledge, sponsor a program, transparency dashboard.

DONATE · TRANSPARENCY

Always within reach

- Language switch: English / Leb Lango
- Search across the whole archive
- "Ask the Assistant" button on every page
- Donate button in the top bar
- Sign in or create an account

WEBSITE FLOW

Site map

The main menu, as built. Every section opens from the top bar on laptops and from a drawer on phones.

About

- About LCI

Contribute

Share heritage, a word, a proverb, an oral history, a document or a site

Contact

- Contact form
- Office details

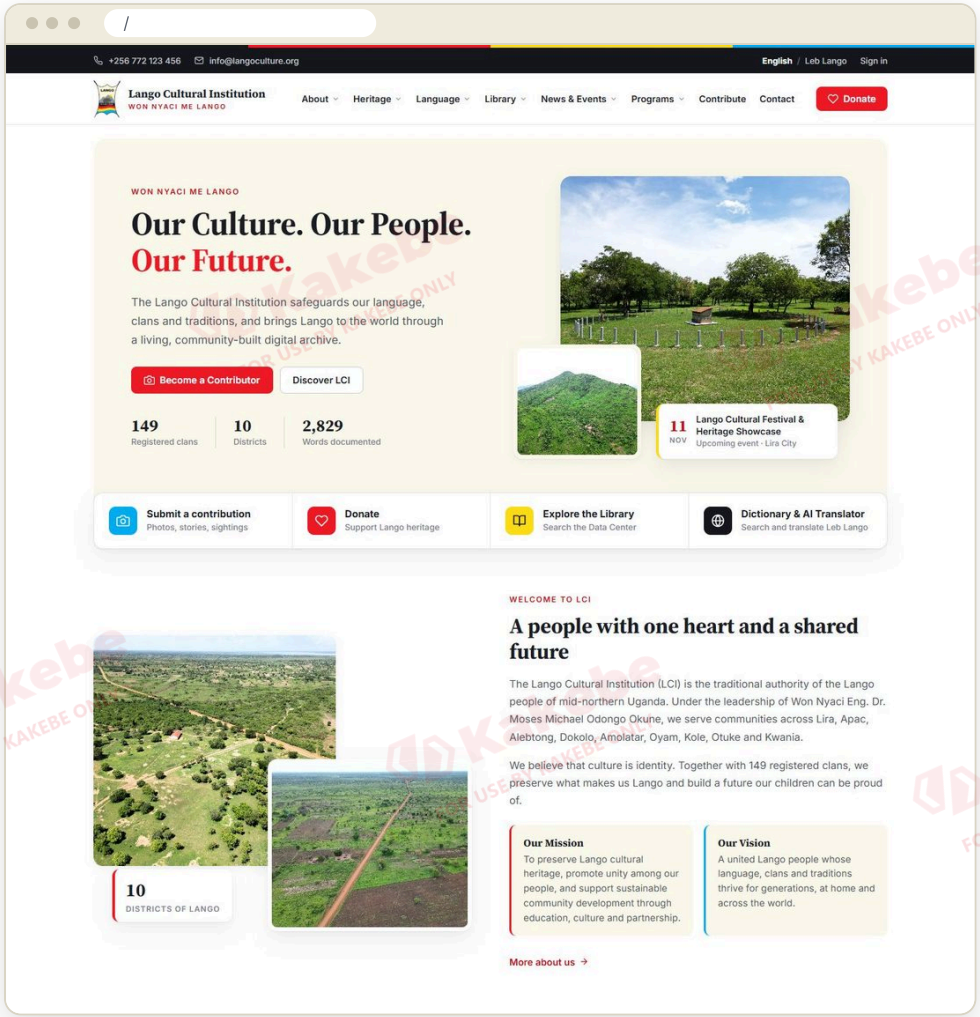

Also on the site: member accounts with points, badges and a leaderboard · donation pledges · newsletter sign-up · search across everything · privacy and terms pages · sitemap.xml and robots.txt · the old static-site links redirect to the new pages.

PUBLIC WEBSITE

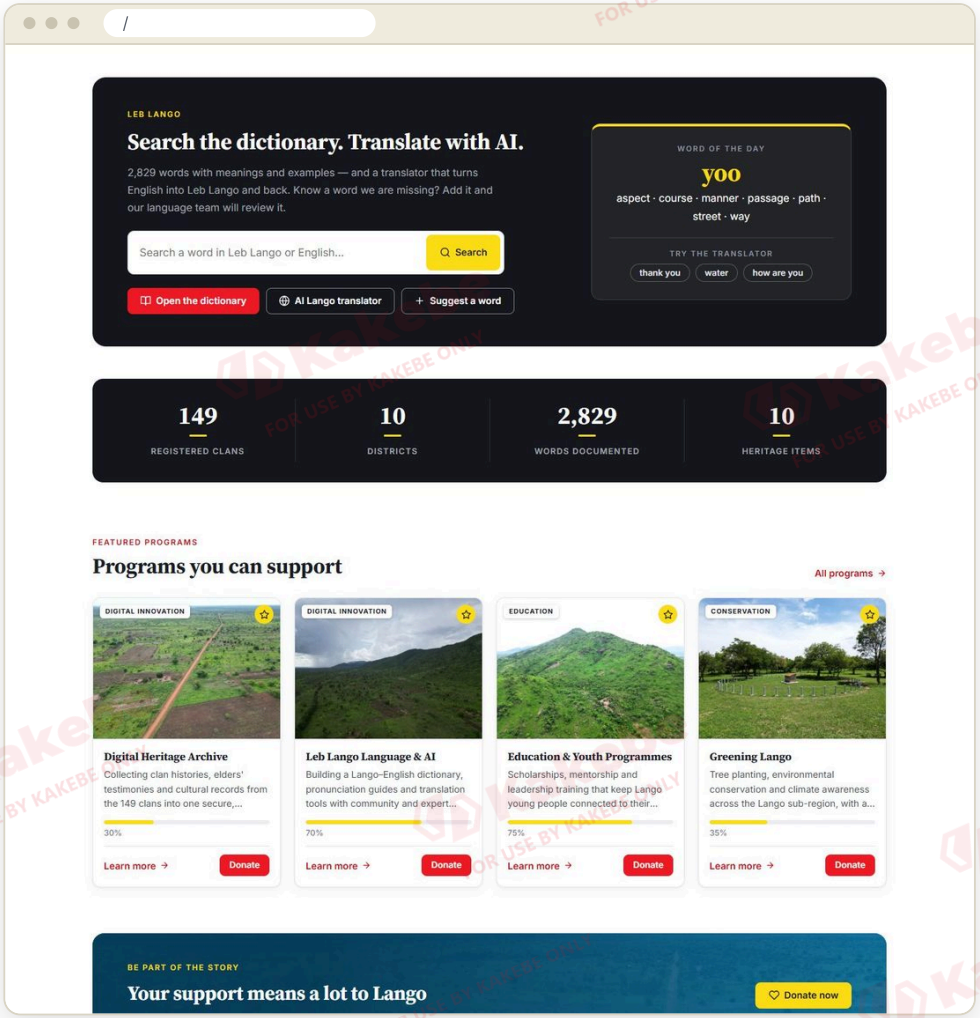

Home: a clear front door

The page that explains who LCI is and where to go next.

- Headline figures: registered clans, districts, words documented
- Four quick actions: contribute, donate, library, dictionary and translator
- Word of the day and a one-click translator
- Programs, events, heritage and notable Langos at a glance

Hero, headline figures and quick actions

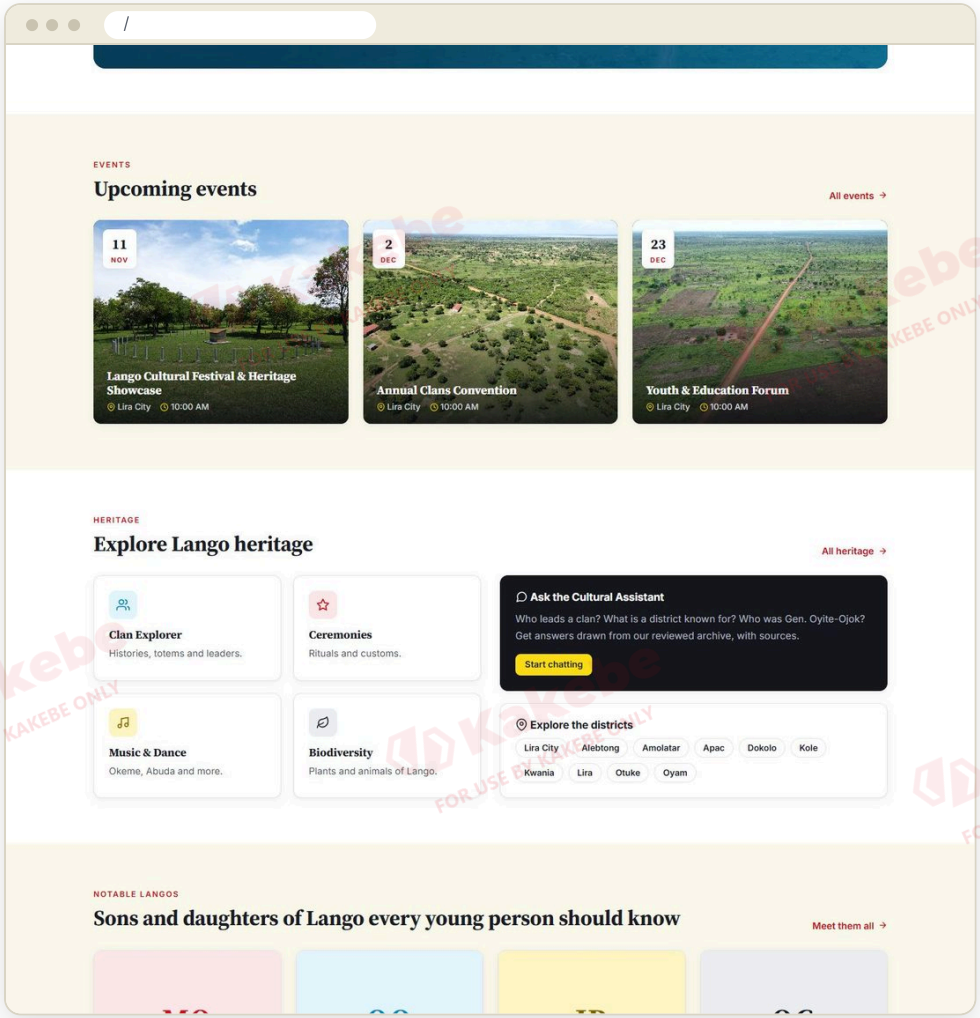

Four ways LCI serves, the dictionary and translator, and programs

PUBLIC WEBSITE

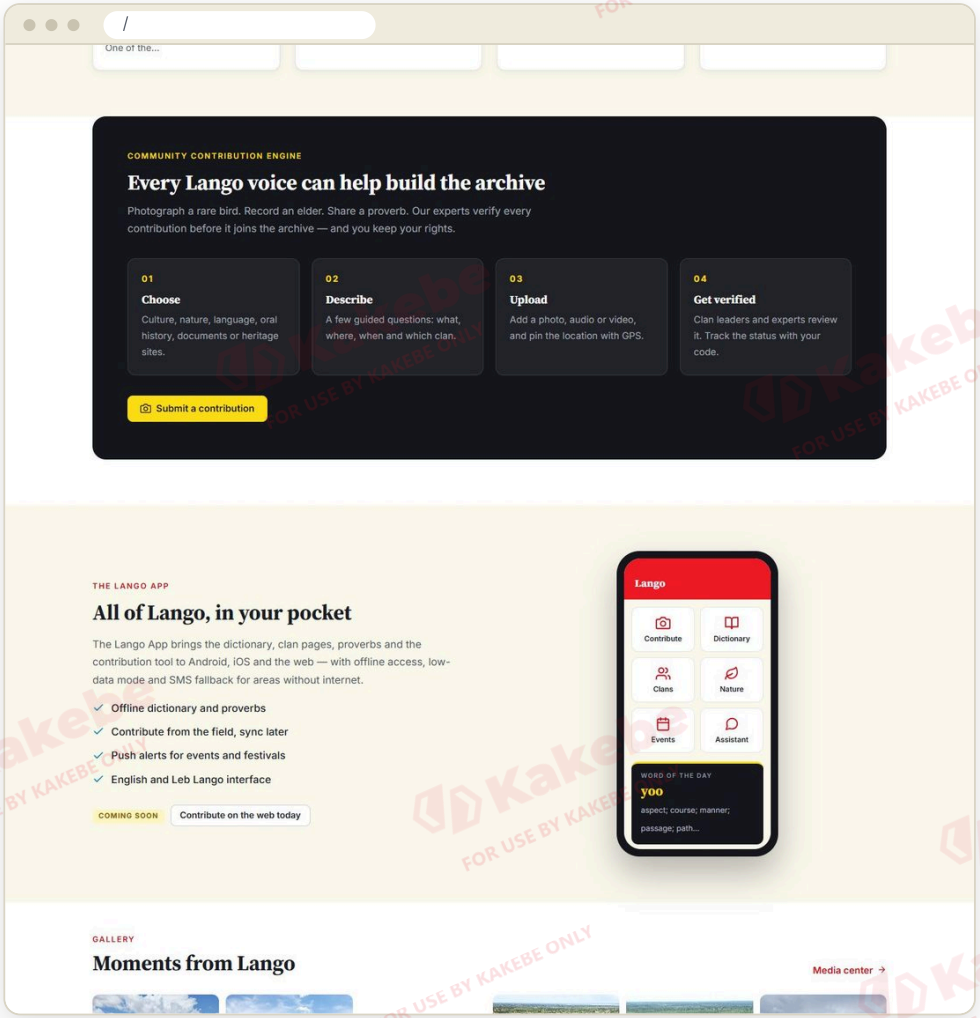

Home, continued

Below the fold, the page walks a visitor through the whole archive and ends with the app and the latest news.

- Upcoming events and the heritage explorer
- Notable Langos, with the contribution engine explained in four steps
- The Lango App promoted with a phone preview
- Media gallery and latest news

Events, heritage explorer and notable Langos

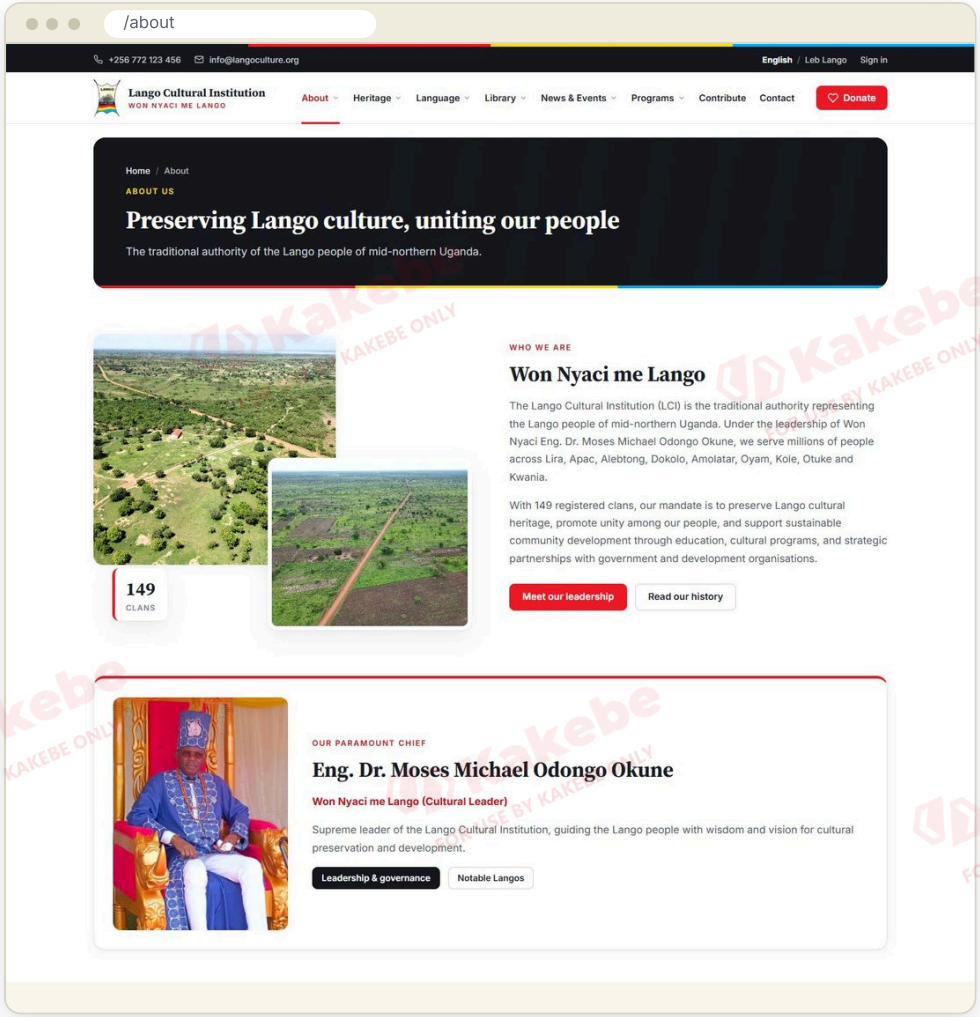

Contribution engine, the Lango App, gallery and news

PUBLIC WEBSITE

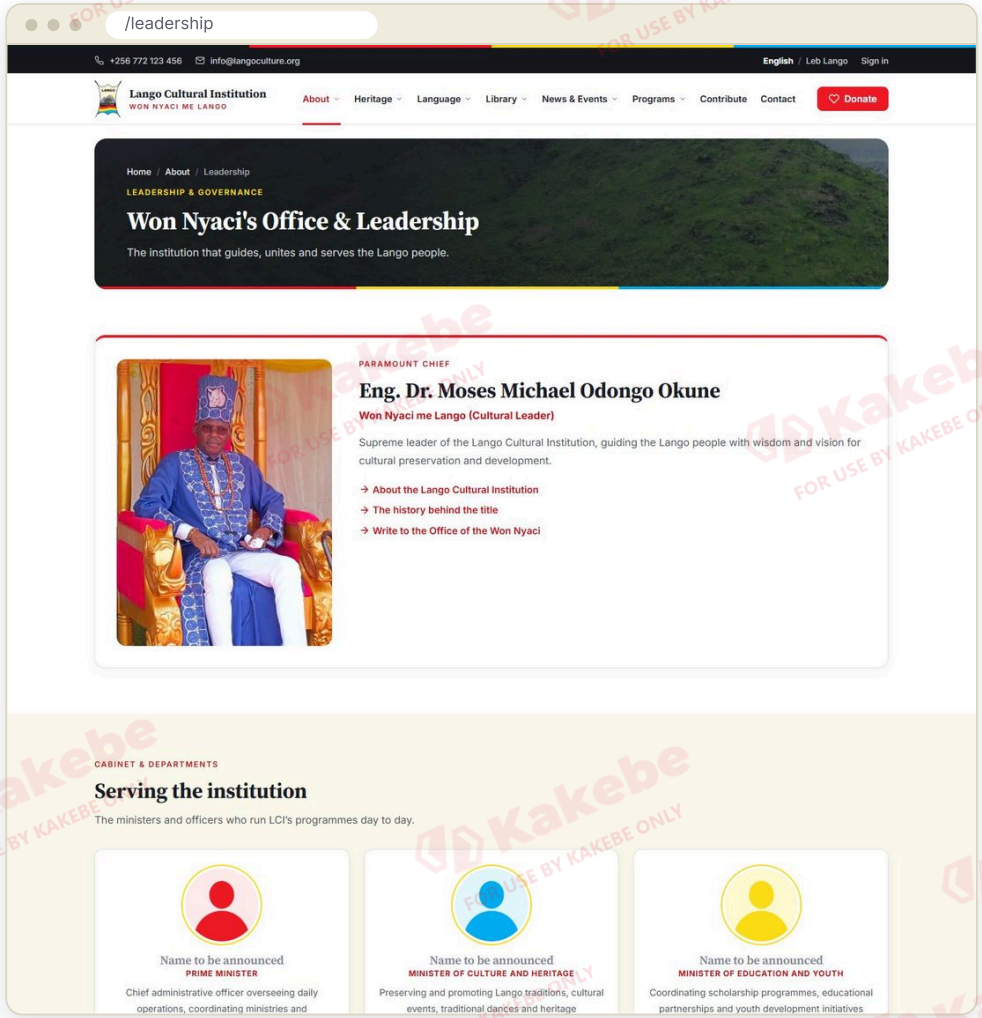

About LCI and the Won Nyaci's office

Who the institution is, what it stands for and who leads it.

- Mission and vision, with the portrait of the Won Nyaci supplied by LCI
- Leadership page for the Won Nyaci, cabinet and elders
- Every figure and name is editable from the admin panel

About LCI

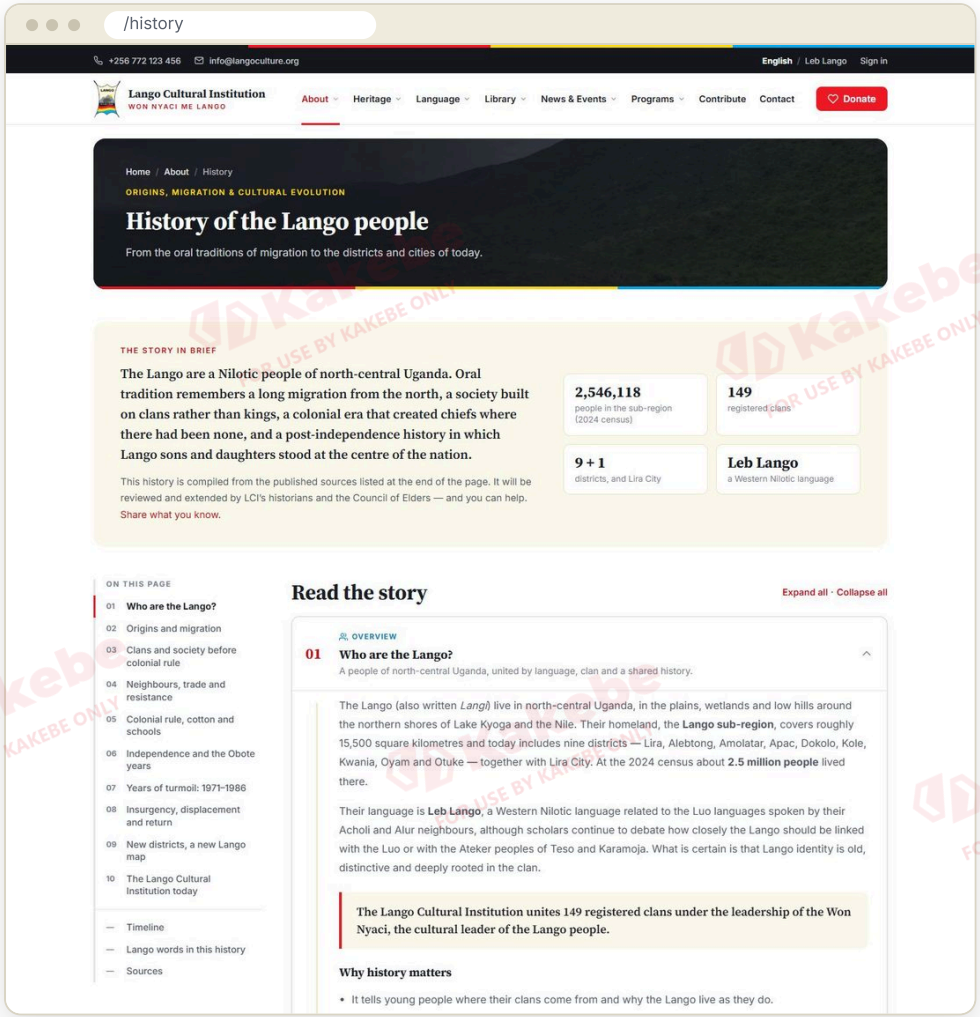

Won Nyaci & Leadership

PUBLIC WEBSITE

Our History

Ten chapters on one page, with a contents list, a timeline and a glossary.

- Chapters open as accordions and have a table of contents
- Timeline of key dates and a glossary of terms
- Compiled from published sources, listed on the page, for LCI's historians to review

Chapters and contents

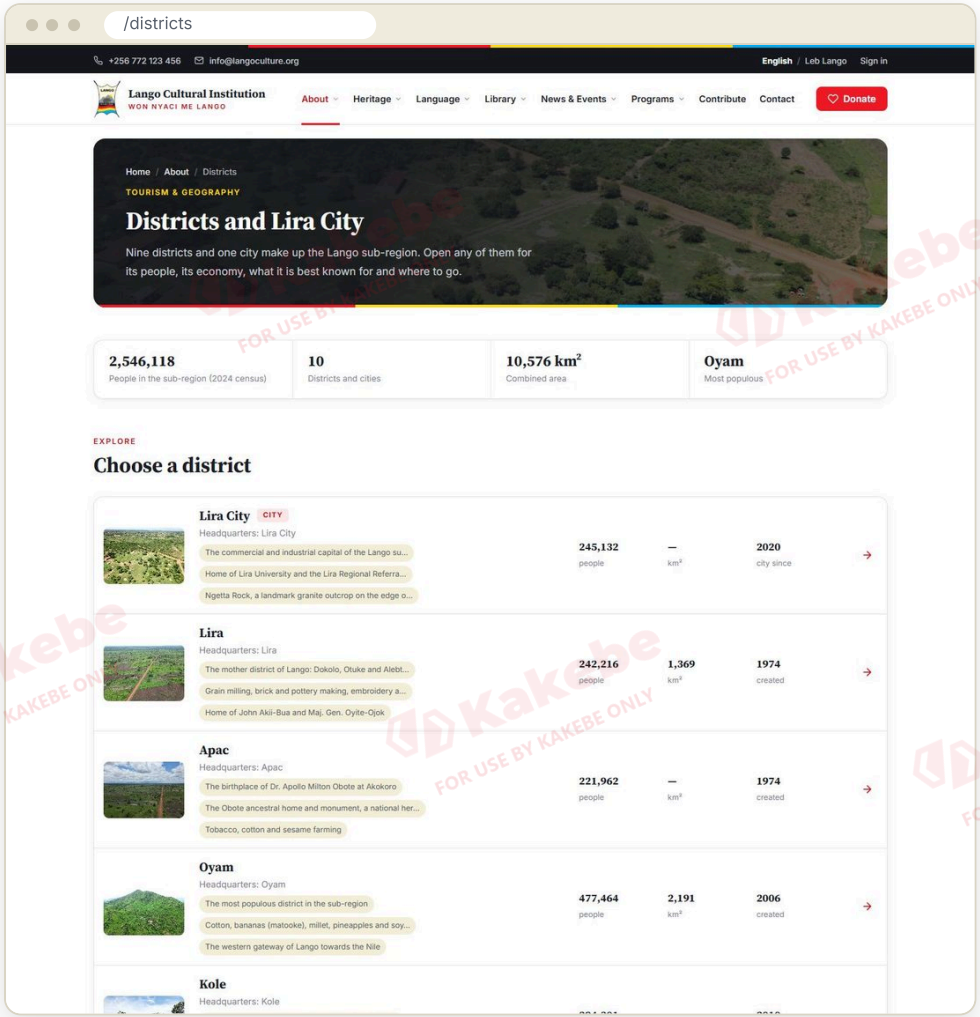

Timeline and sources

PUBLIC WEBSITE

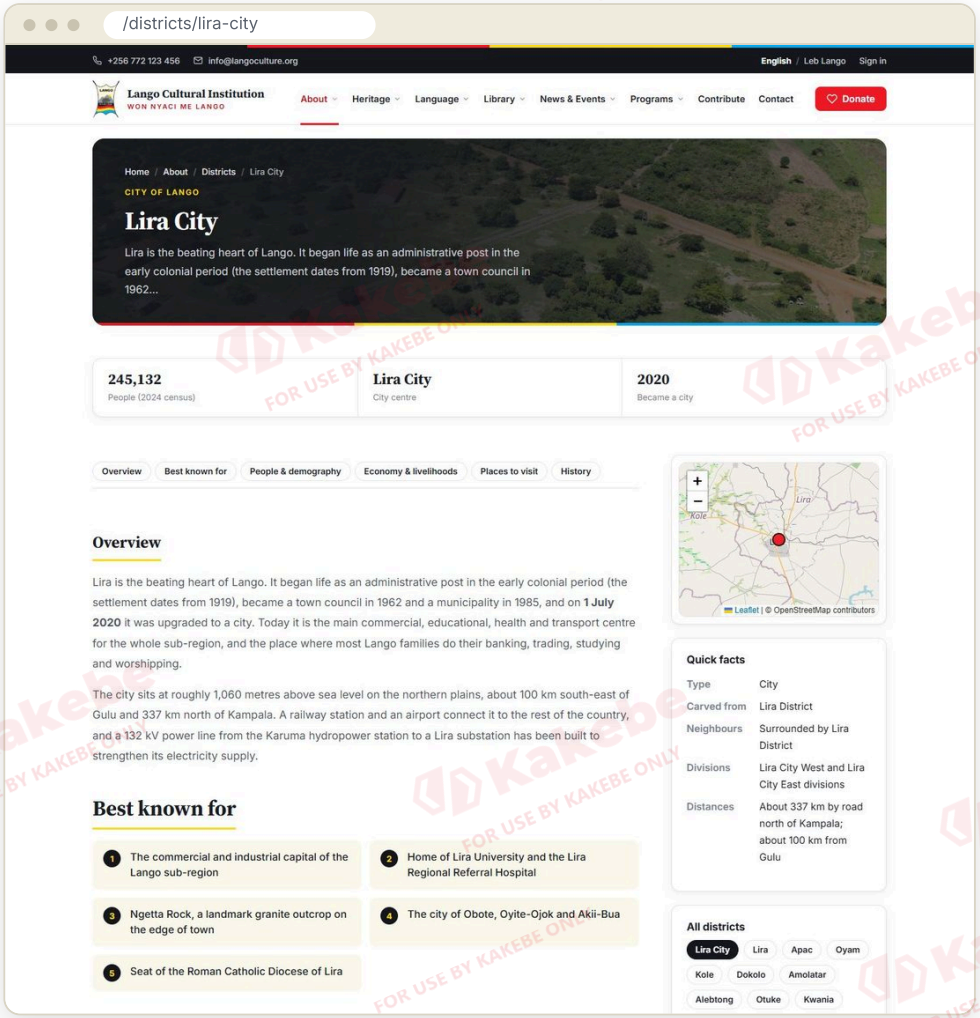

Districts and Lira City

An atlas of the sub-region, with a page for every district.

- Atlas list and comparison table, with a map
- Each page: people (2024 census), economy, best known for, places and history
- Lira City has its own page; links lead to heritage sites and notable people

Atlas of the districts

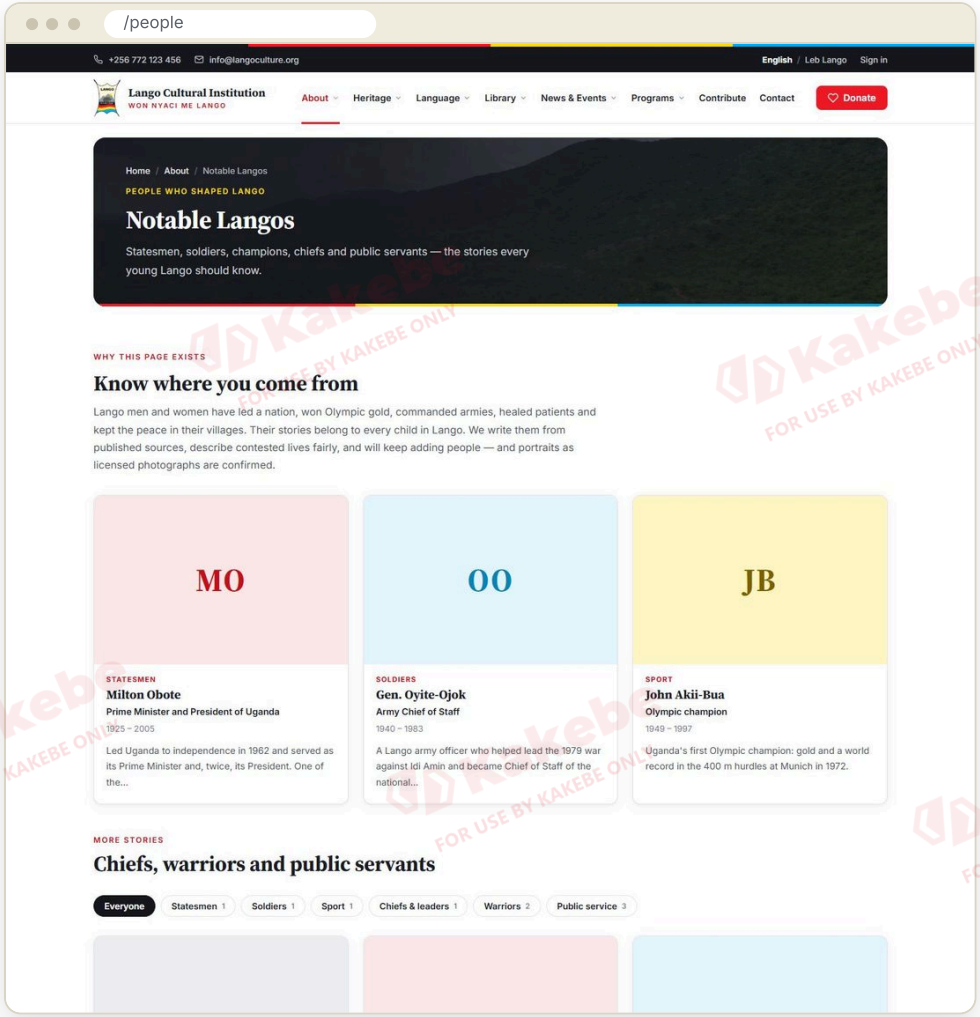

A district page: Lira City

PUBLIC WEBSITE

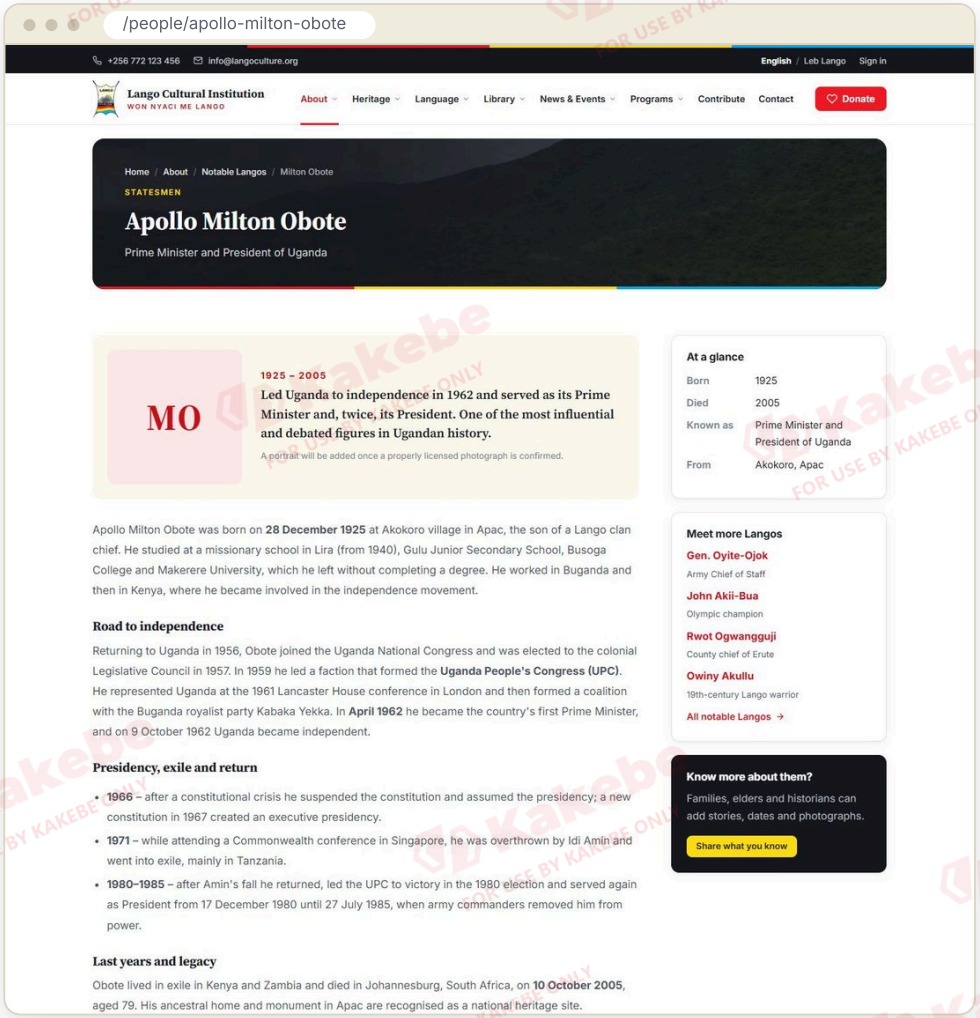

Notable Langos

Stories of sons and daughters of Lango that every young person should know.

- People by category: statesmen, soldiers, sport, chiefs, public service
- Each story has facts, a timeline and sources
- Monograms stand in until licensed portraits are added

The directory

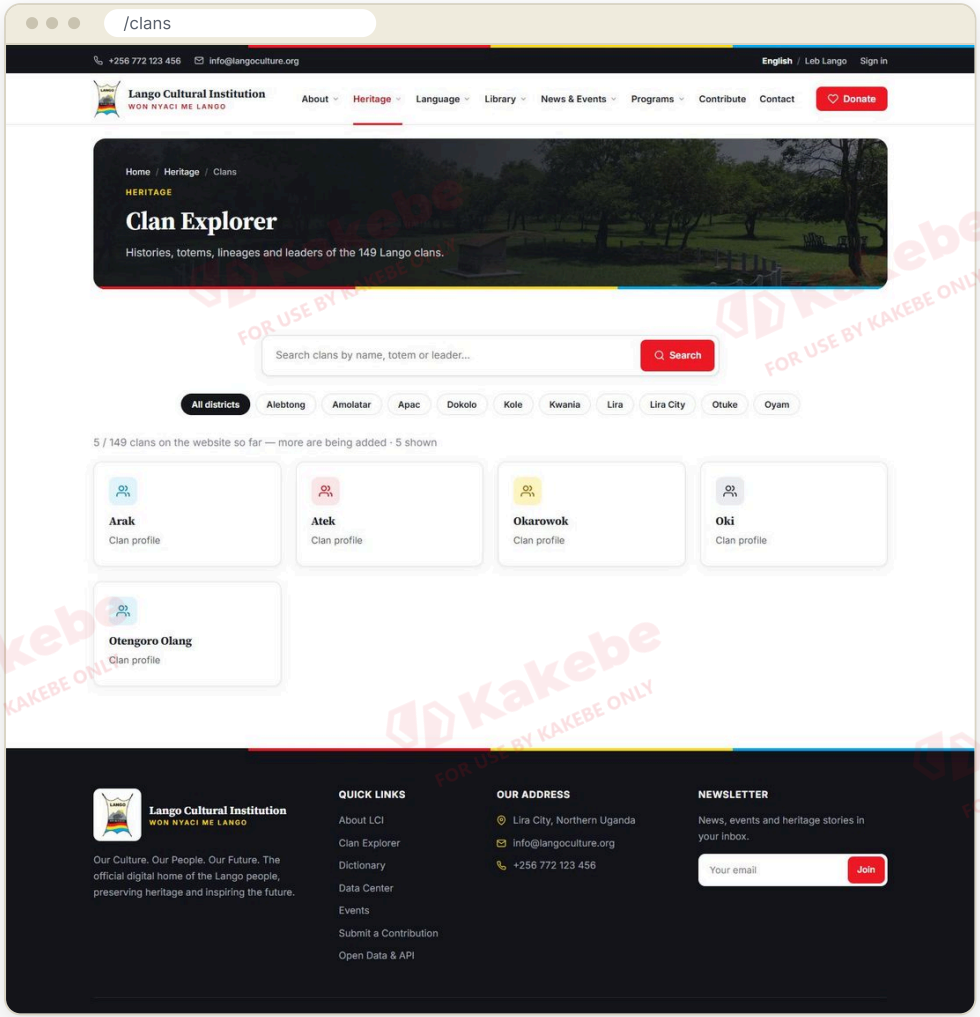

A story page

PUBLIC WEBSITE

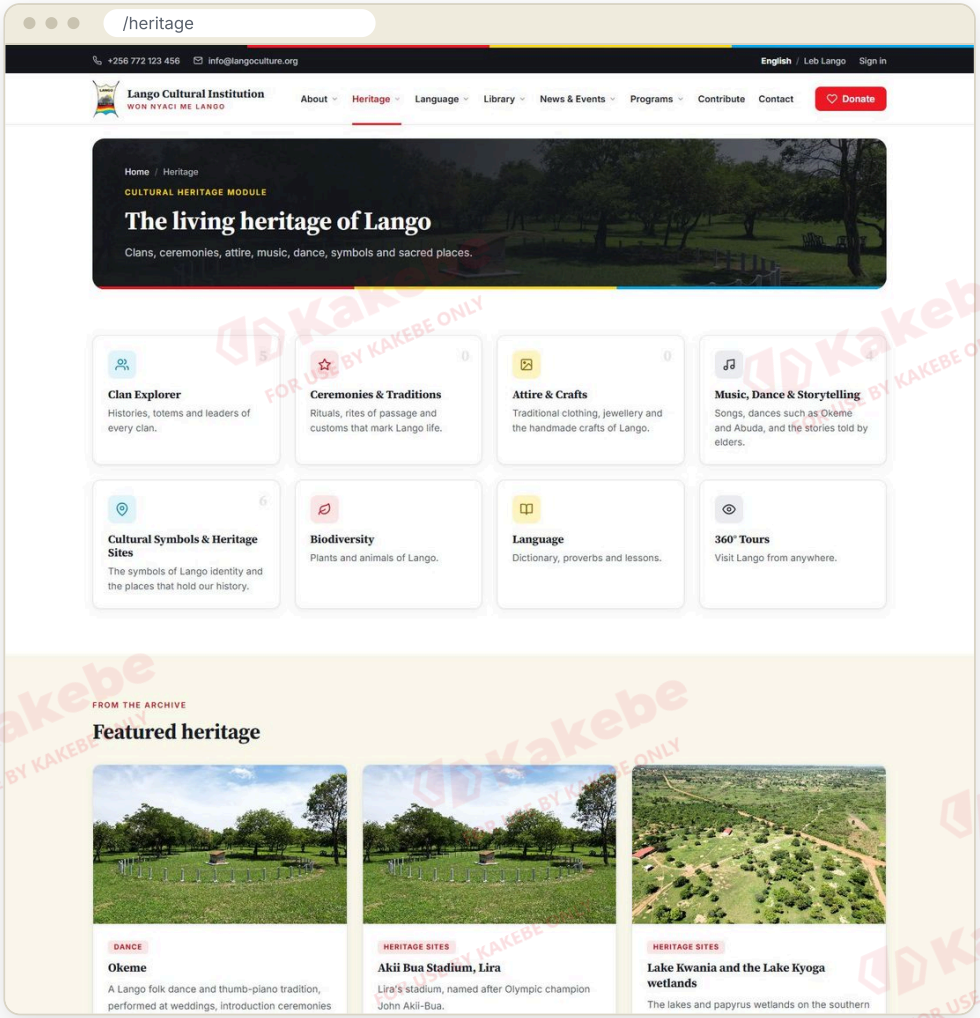

Clans and heritage

Where people find their clan, and the living heritage of the Lango people.

- Clan Explorer with search; clan pages show the clan leader and photo
- Heritage: ceremonies, attire and crafts, music and dance, symbols and sites
- Biodiversity register and 360° tours
- Clans are loaded as LCI verifies them; admins can add many at once

Clan Explorer

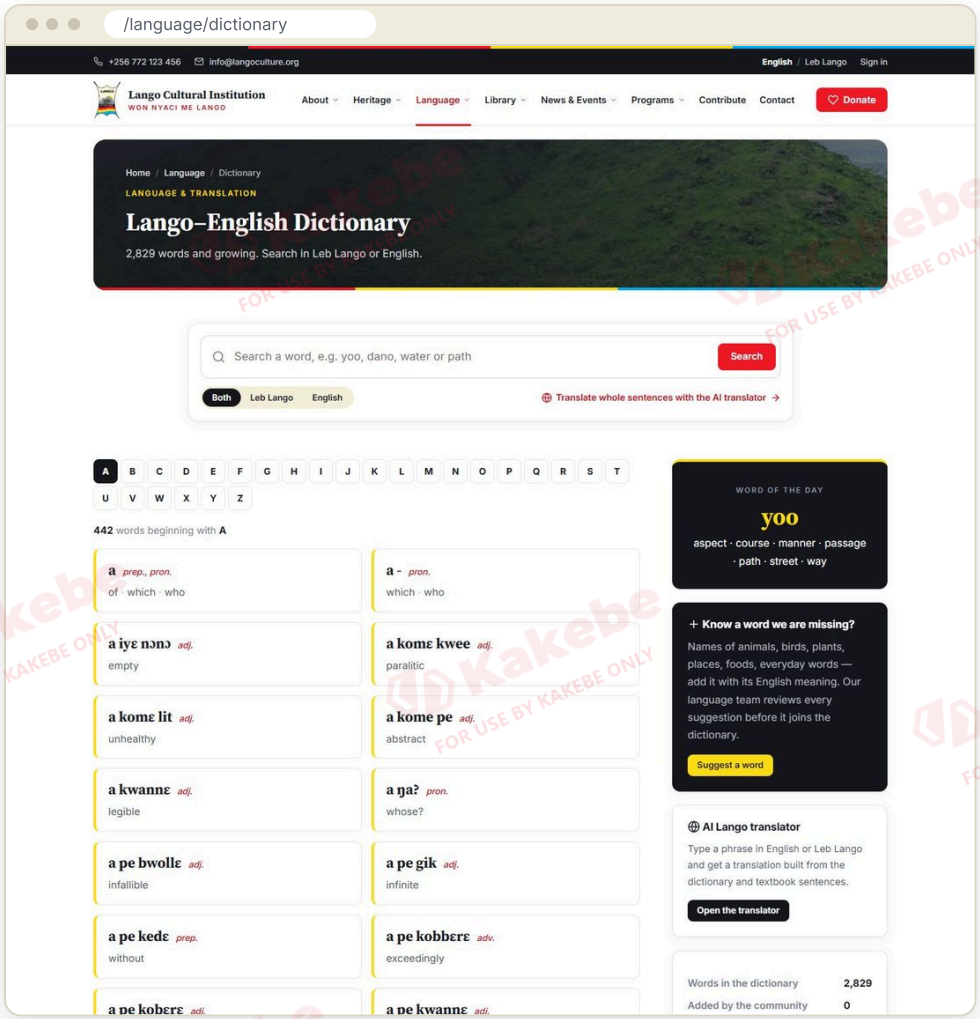

Heritage hub

PUBLIC WEBSITE

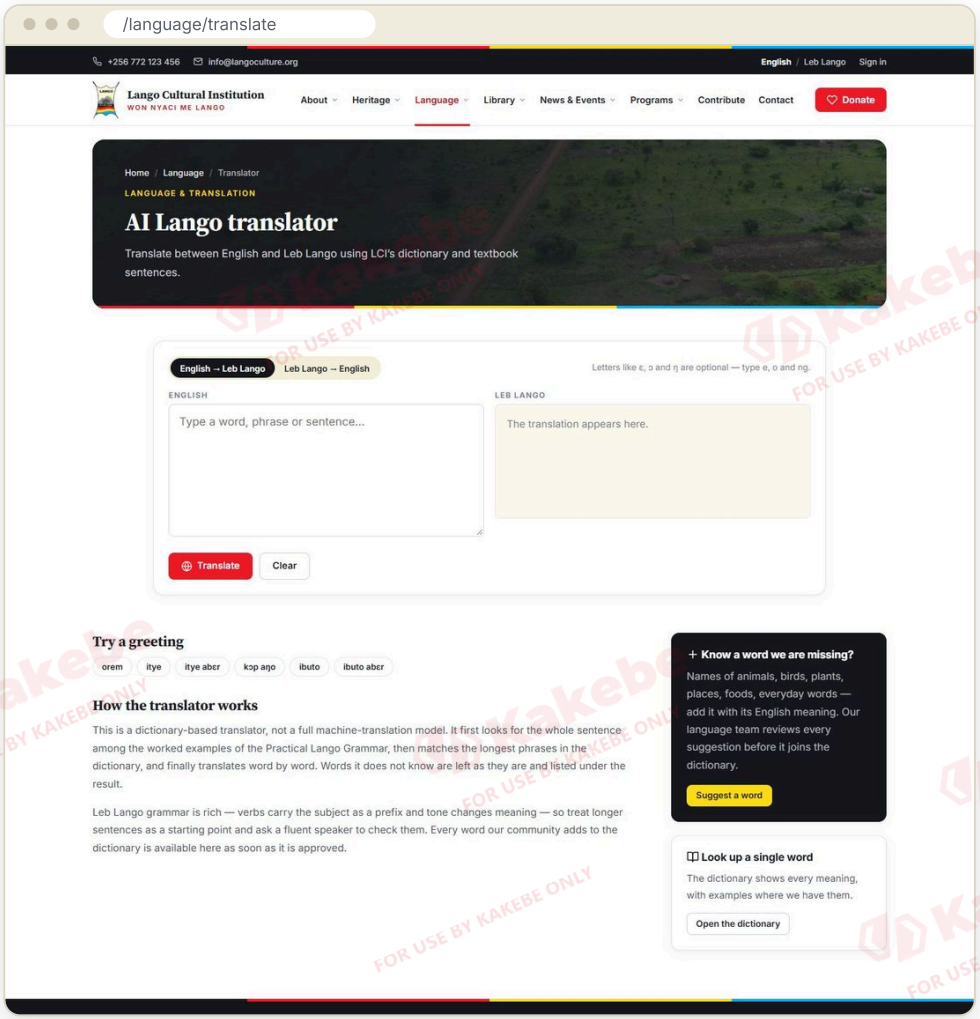

Dictionary and AI translator

A searchable Lango–English dictionary, and a translator that turns English into Leb Lango and back.

- Search with the plain keyboard: type e for ɛ, o for ɔ, ng for ŋ
- A–Z browsing, topics and a word of the day
- The translator checks worked examples from the Practical Lango Grammar first, then phrases, then word by word
- Dictionary-based, not machine translation: a note asks a fluent speaker to check longer sentences

2,829 words with meanings

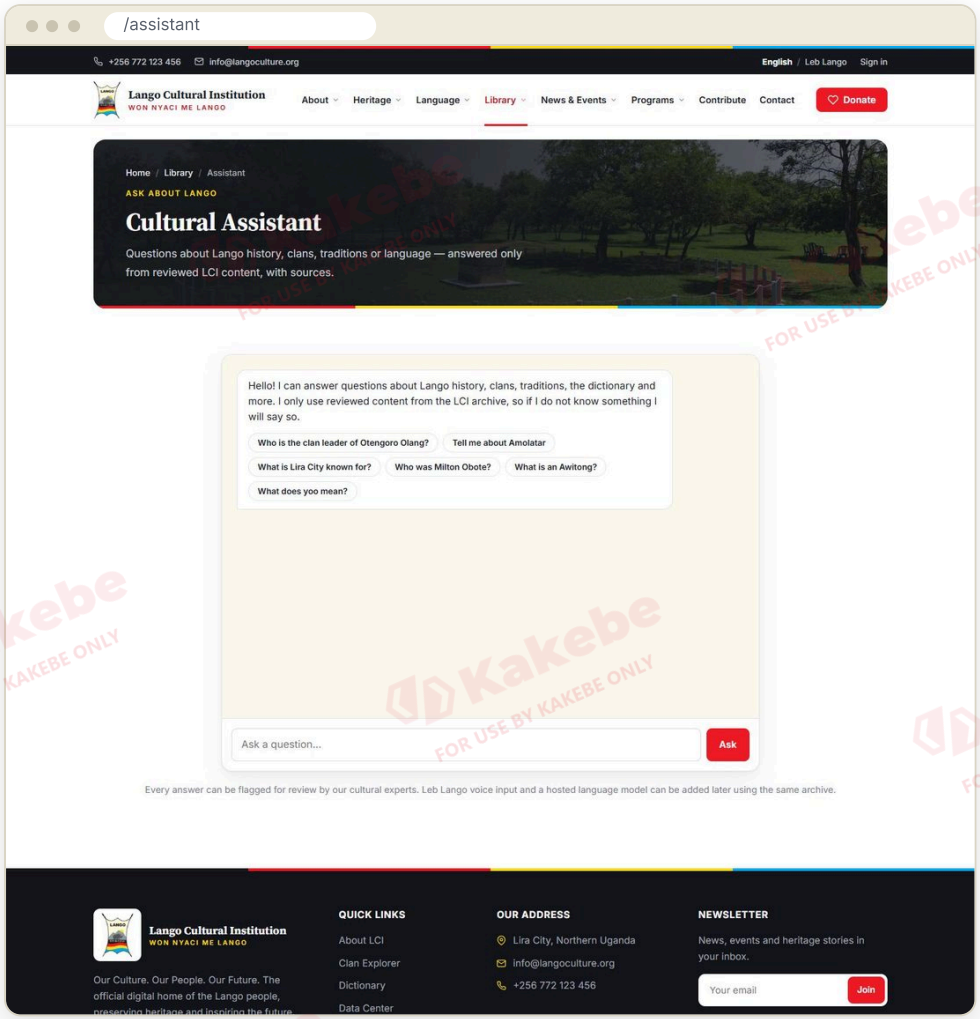

English ⇄ Leb Lango

PUBLIC WEBSITE

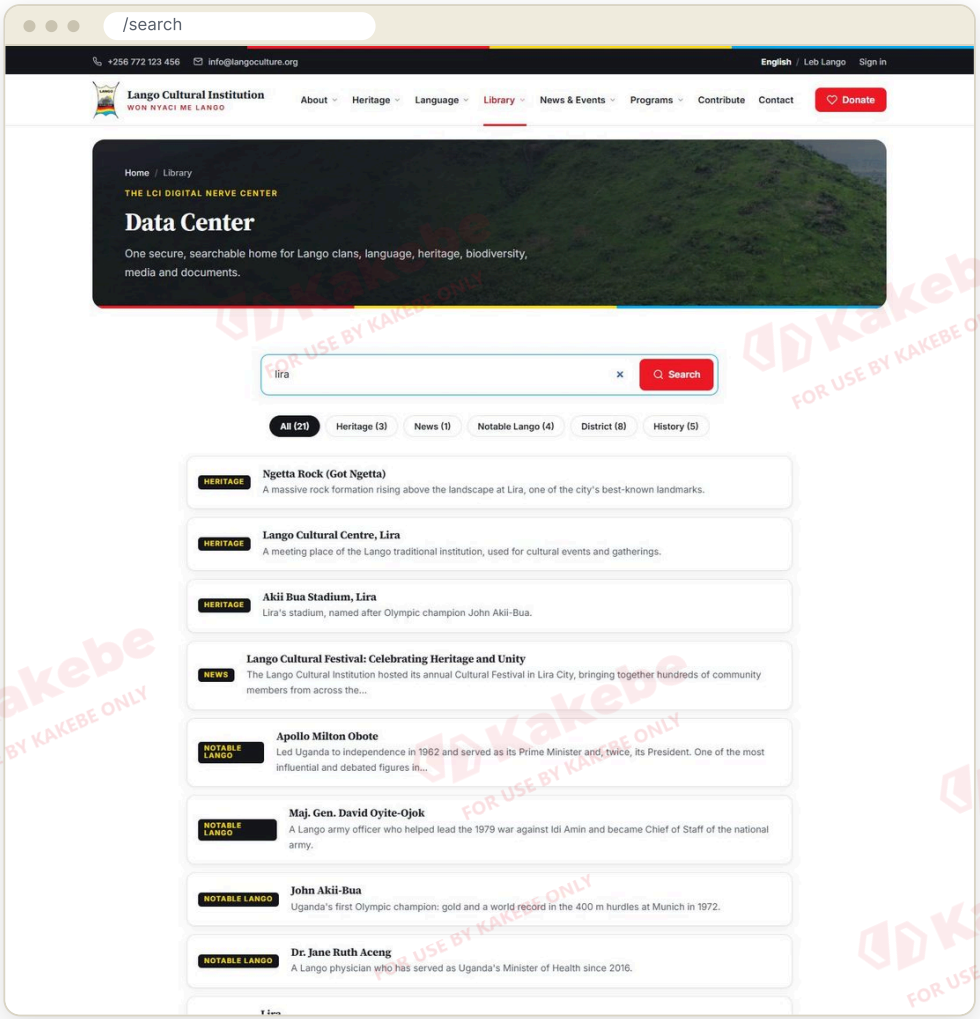

Cultural assistant and Data Center

Ask a question, or search everything the archive holds.

- The assistant answers only from the clan register and reviewed archive, with its sources
- It can answer “Who is the clan leader of …?”, district facts and questions about notable people
- The Data Center searches clans, words, people, heritage, news and documents together

AI cultural assistant

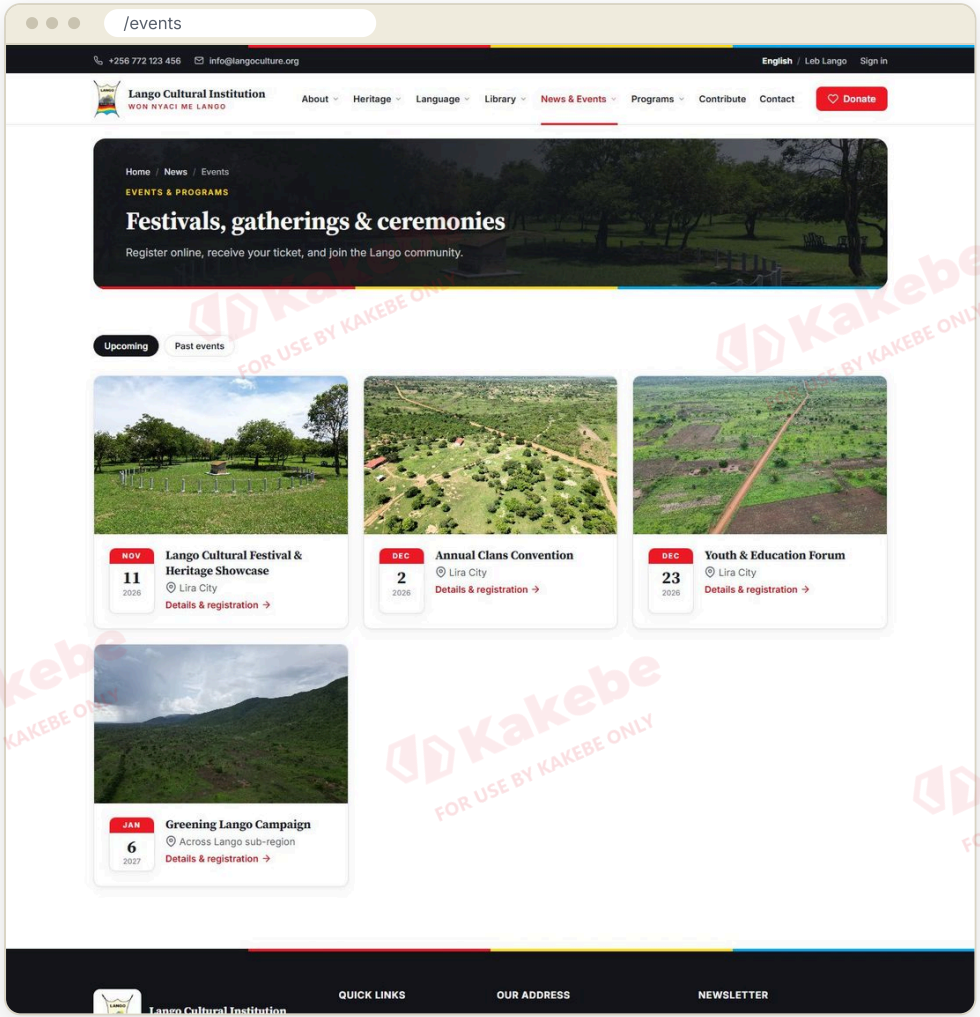

Data Center search

PUBLIC WEBSITE

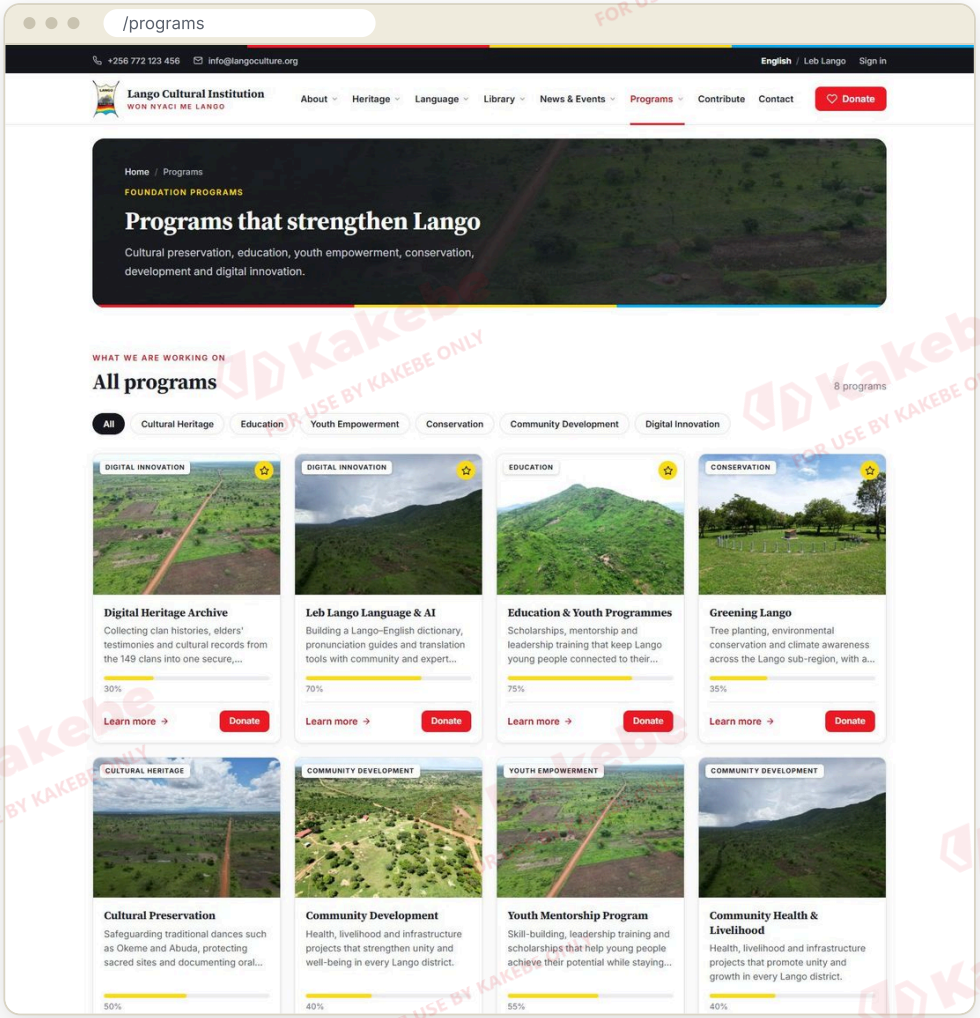

Events, programs and news

What is happening, what LCI is building and how to take part.

- Events with online registration and a printable ticket
- Programs with progress bars and a sponsor button
- News and blog with categories, comments and sharing
- Sample dates and news are placeholders to be replaced before launch

Events

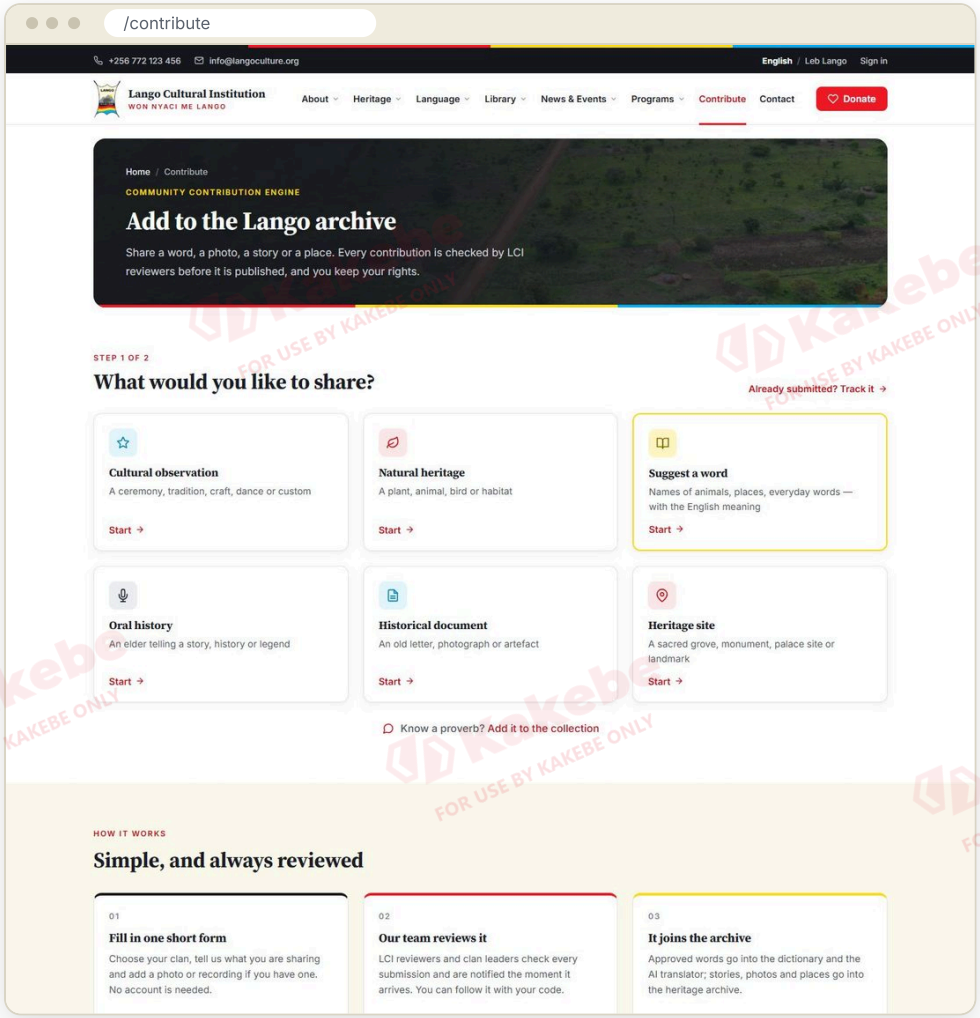

Programs

PUBLIC WEBSITE

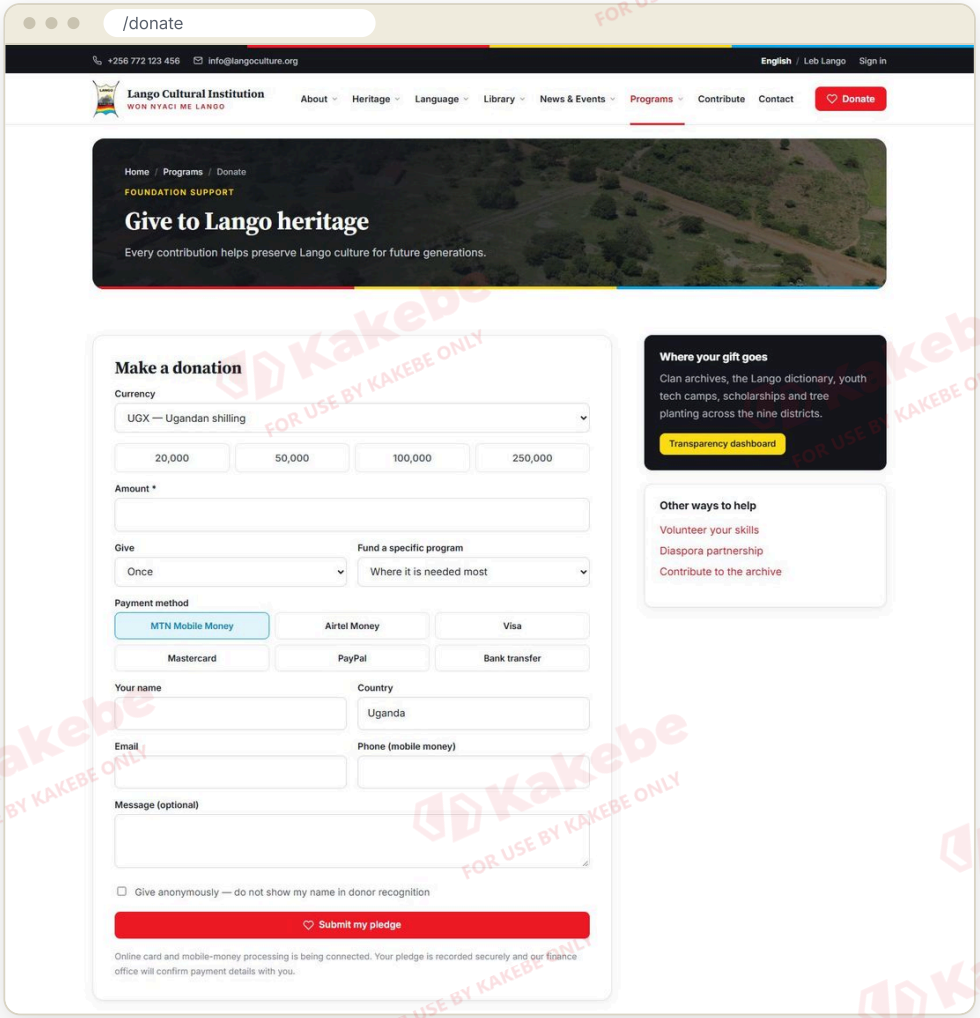

Contribute and donate

Two ways to give: knowledge and money.

- One simple contribution form; an account can be created on the spot
- Clan picker with “my clan is not listed”, which alerts the admins
- Donations are recorded as pledges for the finance office to confirm
- A payment gateway is the next step (see the last pages)

Share something with the archive

Give to Lango heritage

PUBLIC WEBSITE

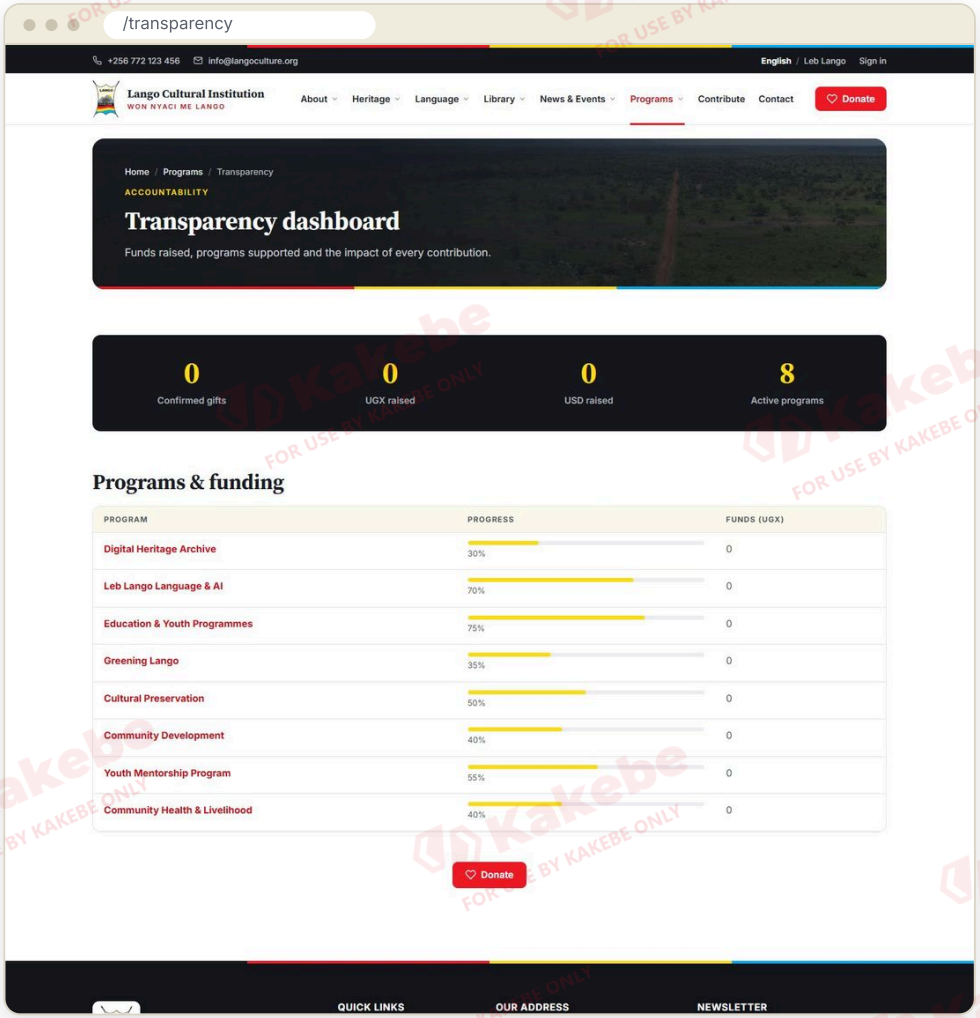

Open data and transparency

Published data that others can build on, and how gifts are used.

- A documented JSON API, with a licence page
- Transparency dashboard: confirmed donations and program funding
- The same API powers the Lango App

Open Data & API

Transparency dashboard

WORKFLOW

From a contribution to the archive

The same flow serves the website and the app. Every step is recorded, and nobody sees unreviewed content.

1

CONTRIBUTOR

Choose what to share

Cultural observation, natural heritage, a word, a proverb, an oral history, a historical document or a heritage site.

2

CONTRIBUTOR

Describe it

Title and story, clan, district and place, GPS pin, date; the contributor confirms permission to share.

3

CONTRIBUTOR

Add media and send

Photo, audio, video or document. A tracking code appears; an account can be created on the spot.

4

SYSTEM

Stored safely, admins alerted

Saved as pending; a bell notification goes to the reviewers. In the app, a lost connection queues it for later.

5

REVIEWER

Review

A reviewer opens the queue, reads it, checks duplicates, can edit and add a note.

6

REVIEWER

Decide

Approve, ask for more information or decline. The member always sees the status.

7

SYSTEM

Publish

Words join the dictionary and translator at once; other records become draft archive entries to finish and publish.

8

MEMBER

Member notified

In-app notification and push message, points added, levels and badges updated, status trackable by code.

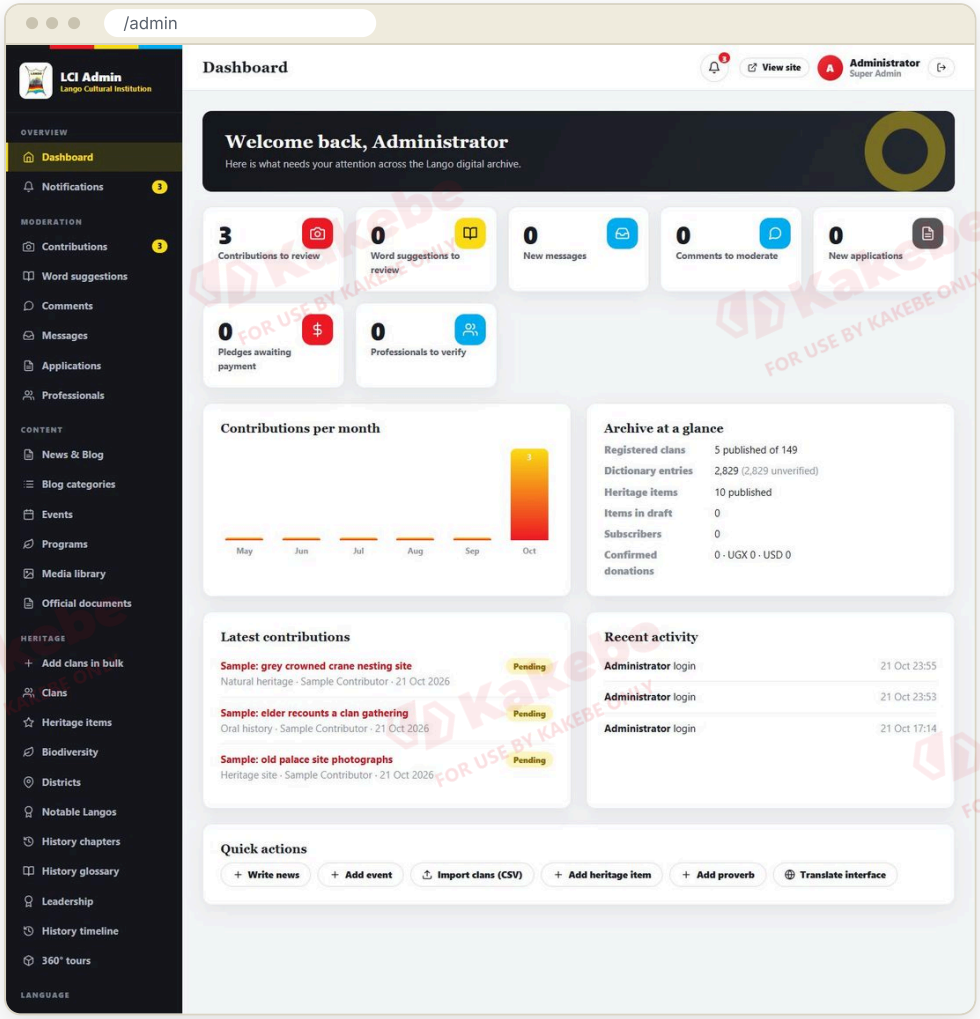

Contributor · System · LCI reviewer · Member

ADMIN CONTROL PANEL

One place to run the archive

A role-based panel. Staff see only the screens their role allows, and the first sign-in forces a new password.

- Super admin and admin: everything
- Editor: content · Moderator: community submissions, comments, messages
- Clan leader: only their own clan, and cannot self-publish
- Contributors are public accounts with no admin access

The dashboard

Overview
Dashboard · Notifications

Moderation
Contributions · Word suggestions · Comments · Messages · Applications · Professionals

Content
News & Blog · Events · Programs · Media library · Official documents

Heritage
Clans · Districts · Notable Langos · History · Heritage items · Biodiversity · 360° tours · Leadership

Language
Dictionary · Proverbs · Lessons · Assistant knowledge and questions

Community
Donations · Event registrations · Subscribers · Partners

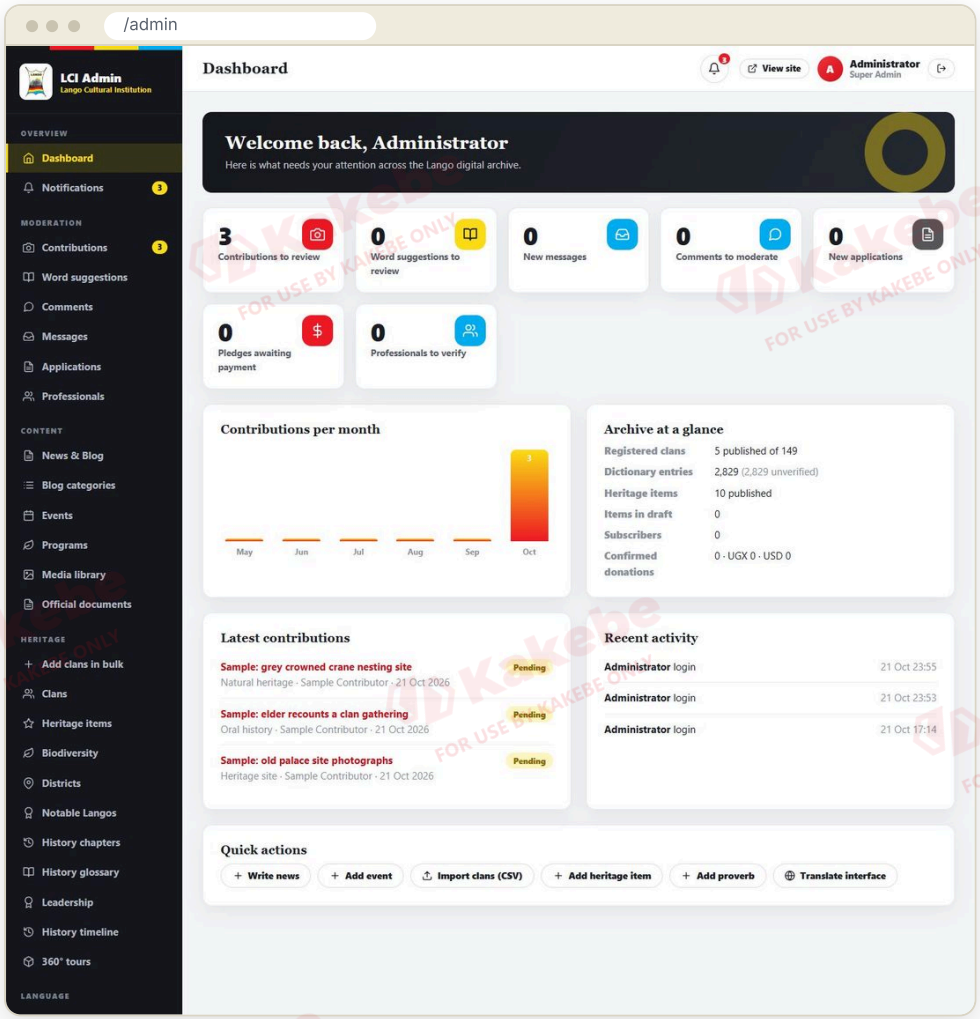

System
Users & roles · Site settings · Translations · Audit log · Backup

ADMIN CONTROL PANEL

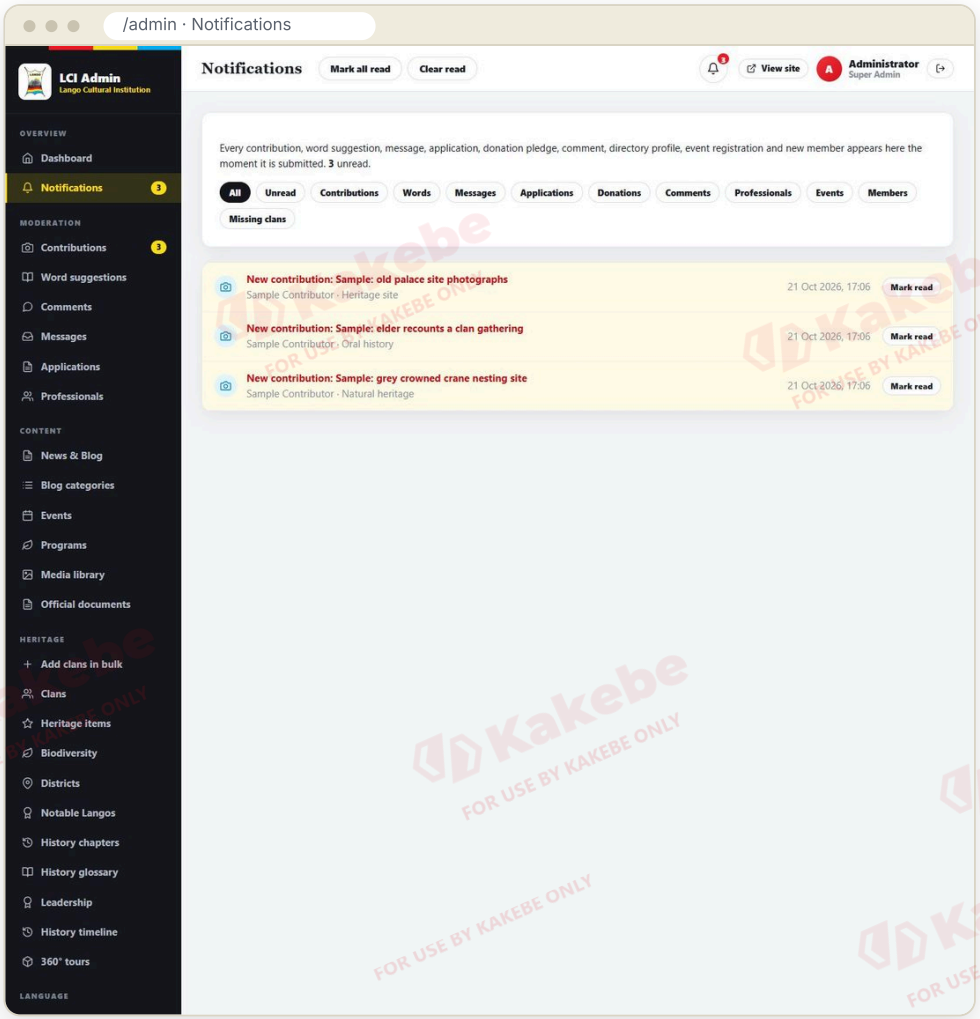

Dashboard and bell notifications

What needs attention, the moment it happens.

- Counters for contributions to review, word suggestions, messages, comments, pledges and professionals to verify
- Contributions per month and an archive-at-a-glance panel
- The bell lists every submission: contribution, word, message, application, donation, comment, directory profile, event registration, new member, or a clan missing from the register

Dashboard

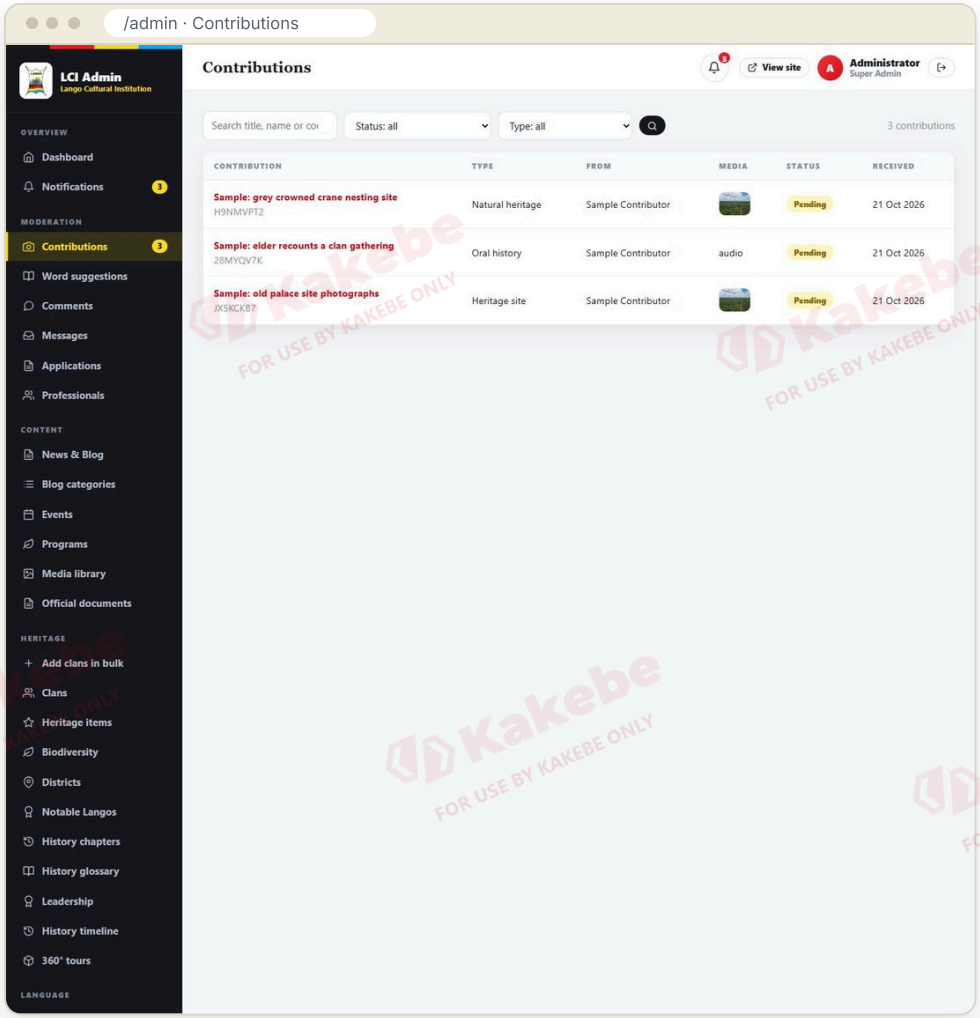

Notifications (sample submissions shown)

ADMIN CONTROL PANEL

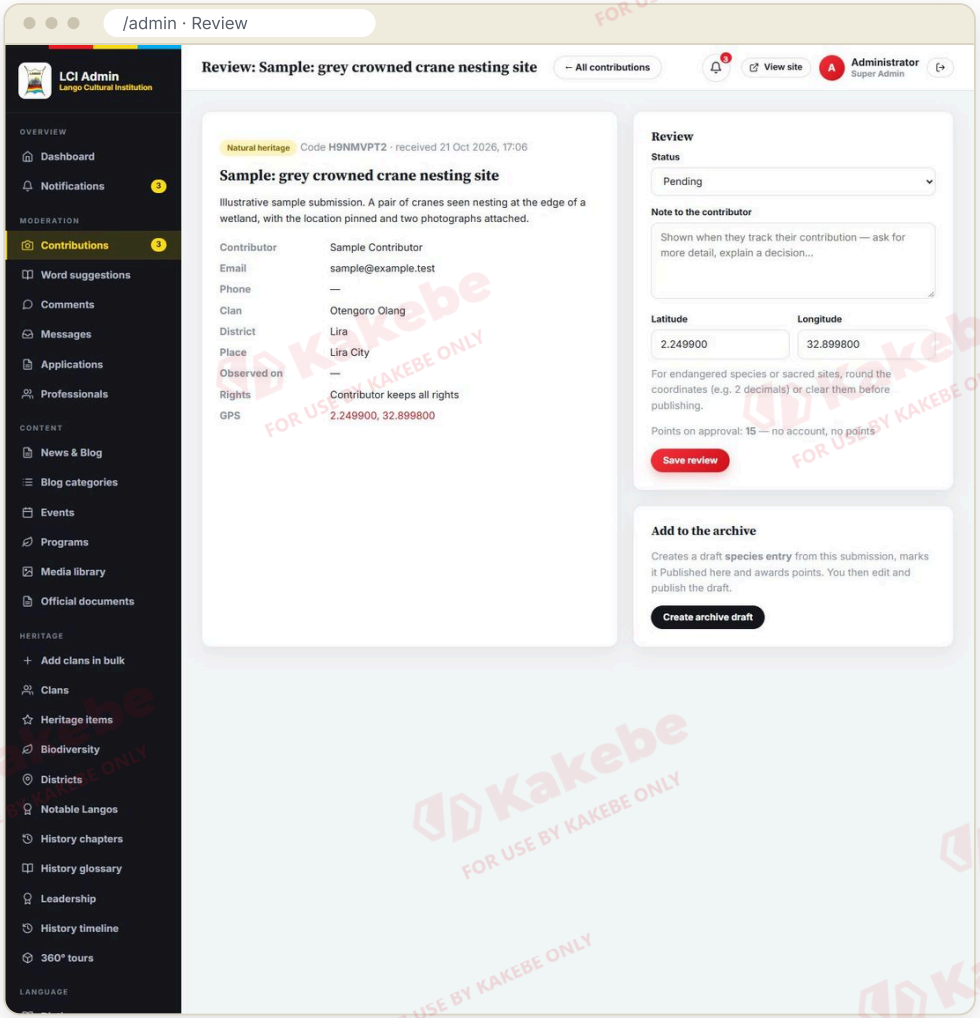

Moderation queue and review

Every contribution is read by a person before it joins the archive.

- Filter by status and type; media thumbnails in the list
- Review: change status, write a note the contributor sees, award points
- “Add to archive” turns an approved record into a draft entry
- The entries shown are illustrative samples created for this document

The queue

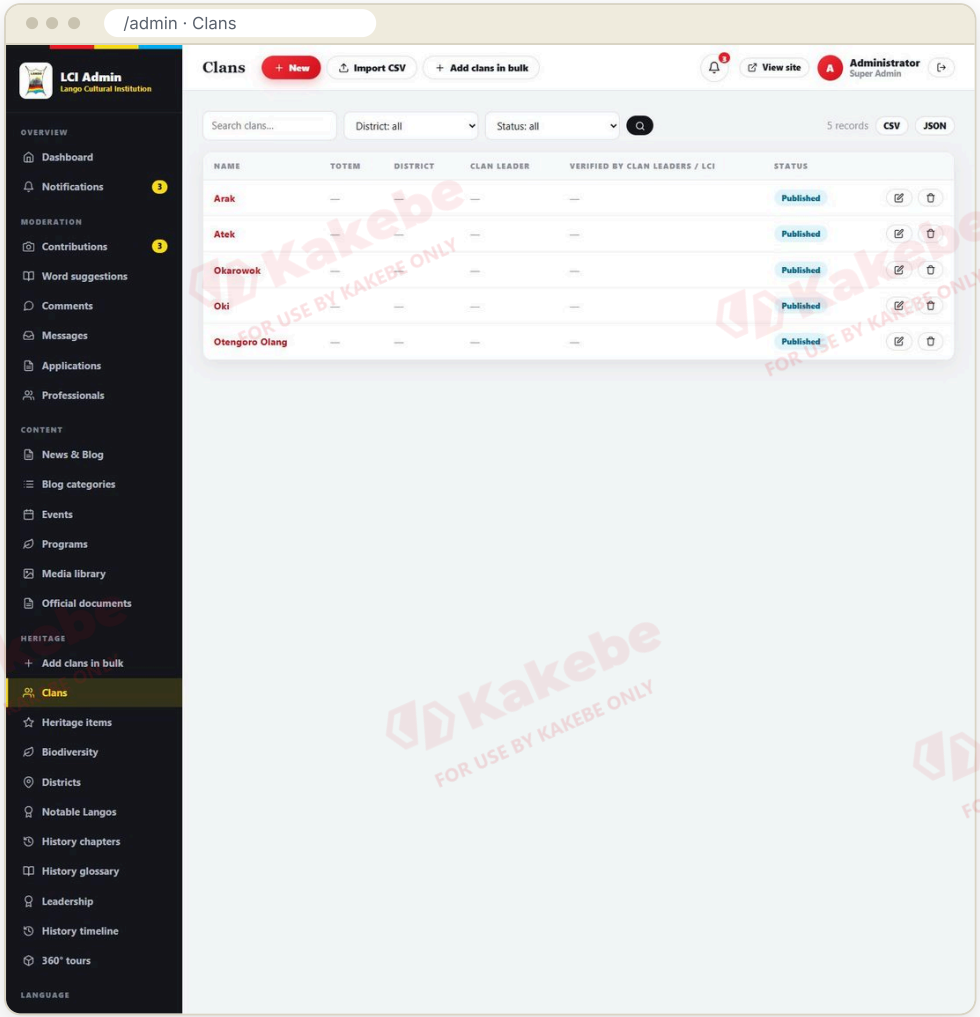

Reviewing one submission

ADMIN CONTROL PANEL

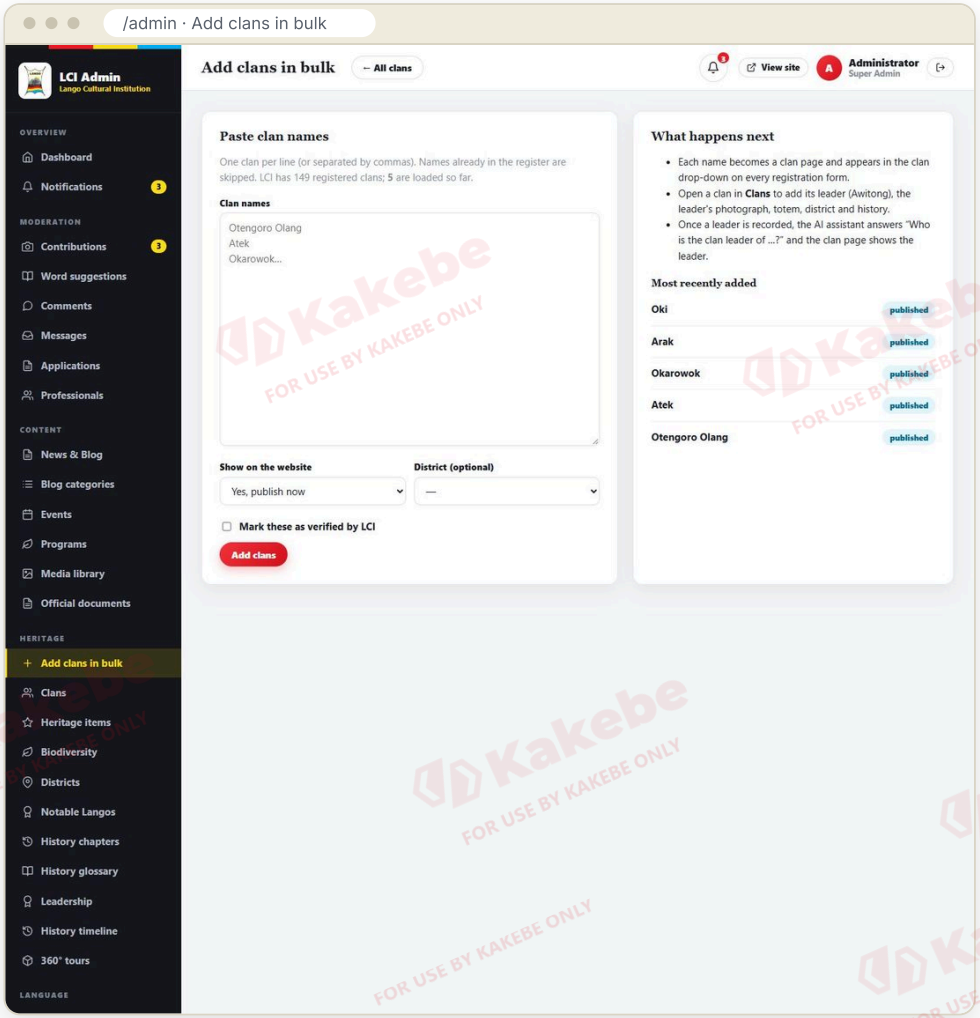

Clans and heritage records

Build the clan register as fast as LCI can verify it.

- Clan list with search, district filter, leader and verification status
- Add clans in bulk: paste names, one per line; names already in the register are skipped
- CSV import for the full 149; rows arrive as drafts for verification
- Clan leaders can maintain their own clan page

Clan register

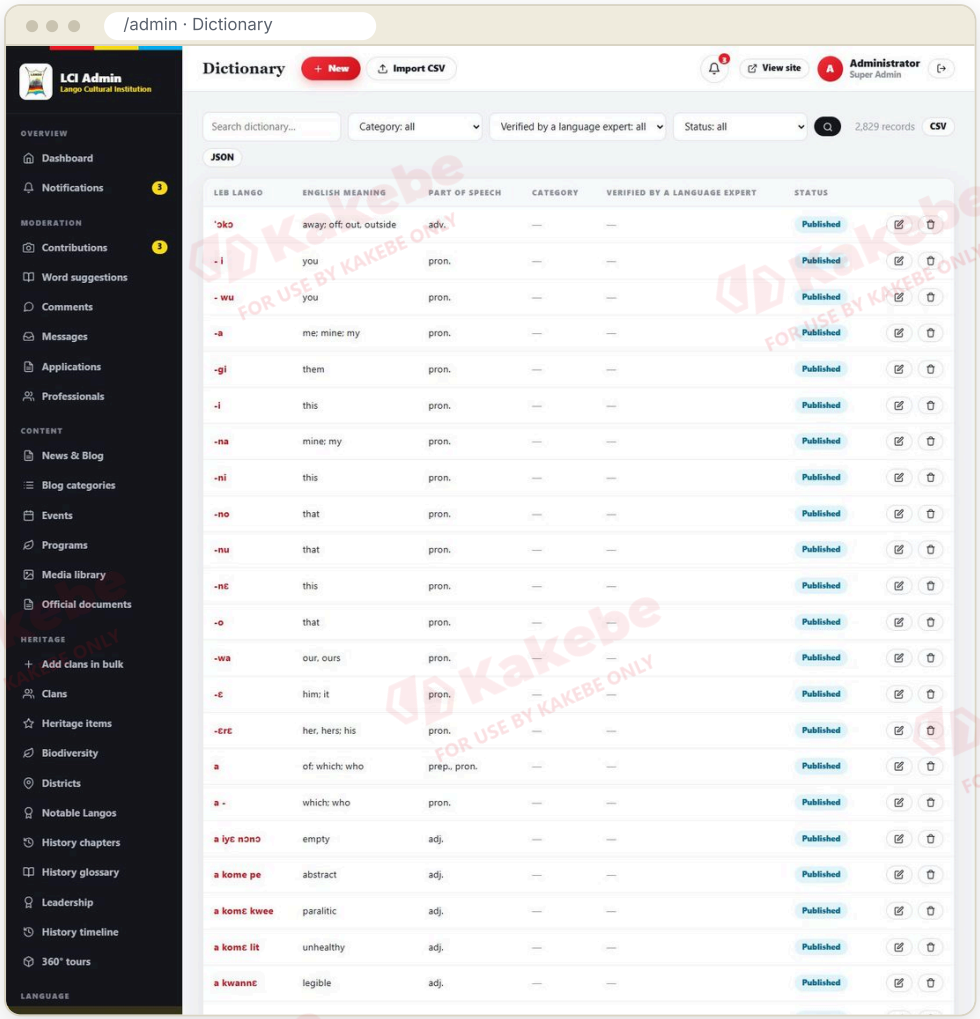

Add clans in bulk

ADMIN CONTROL PANEL

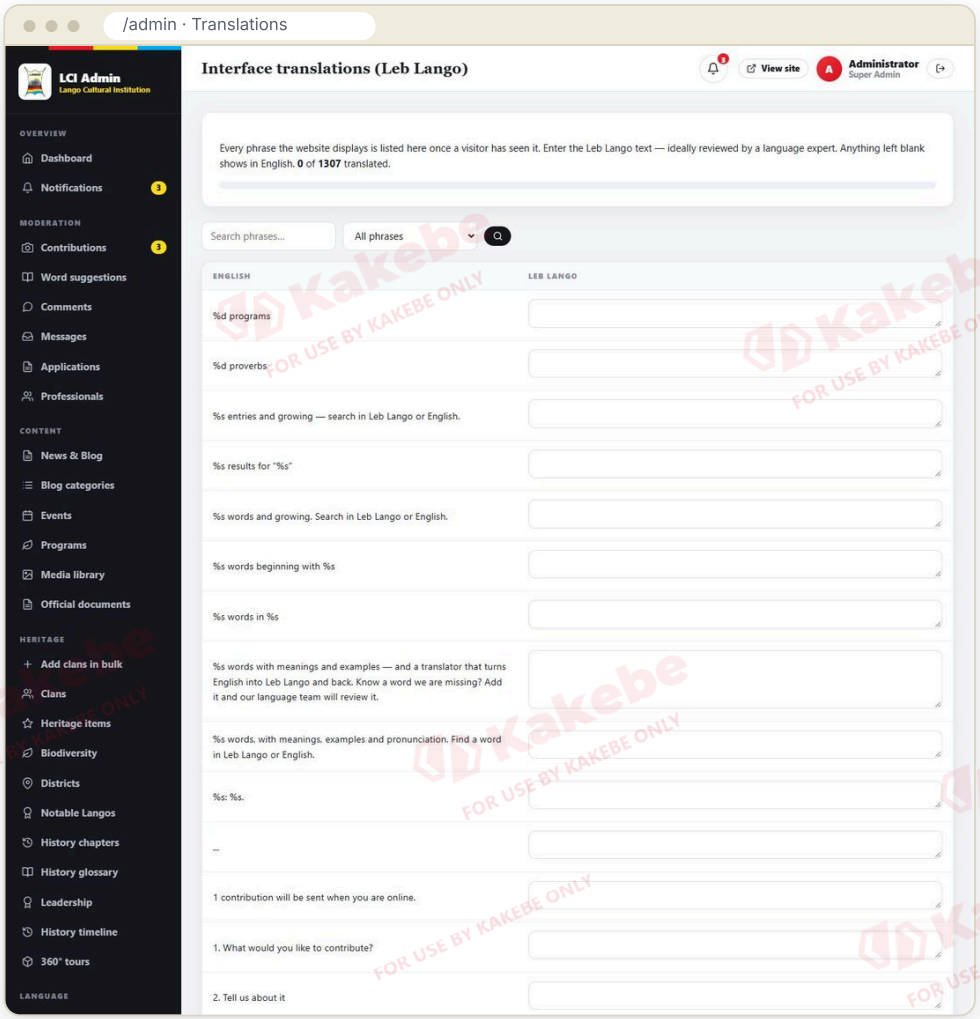

Dictionary and translations

The language team's workspace: words, and the Leb Lango for every phrase of the site and app.

- Dictionary with 2,829 entries; verified-by-expert flag, categories and CSV import
- Word suggestions from the public are approved straight into the dictionary and translator
- Translations: every phrase of the website and the app is listed so an expert can enter Leb Lango; blanks fall back to English

Dictionary manager

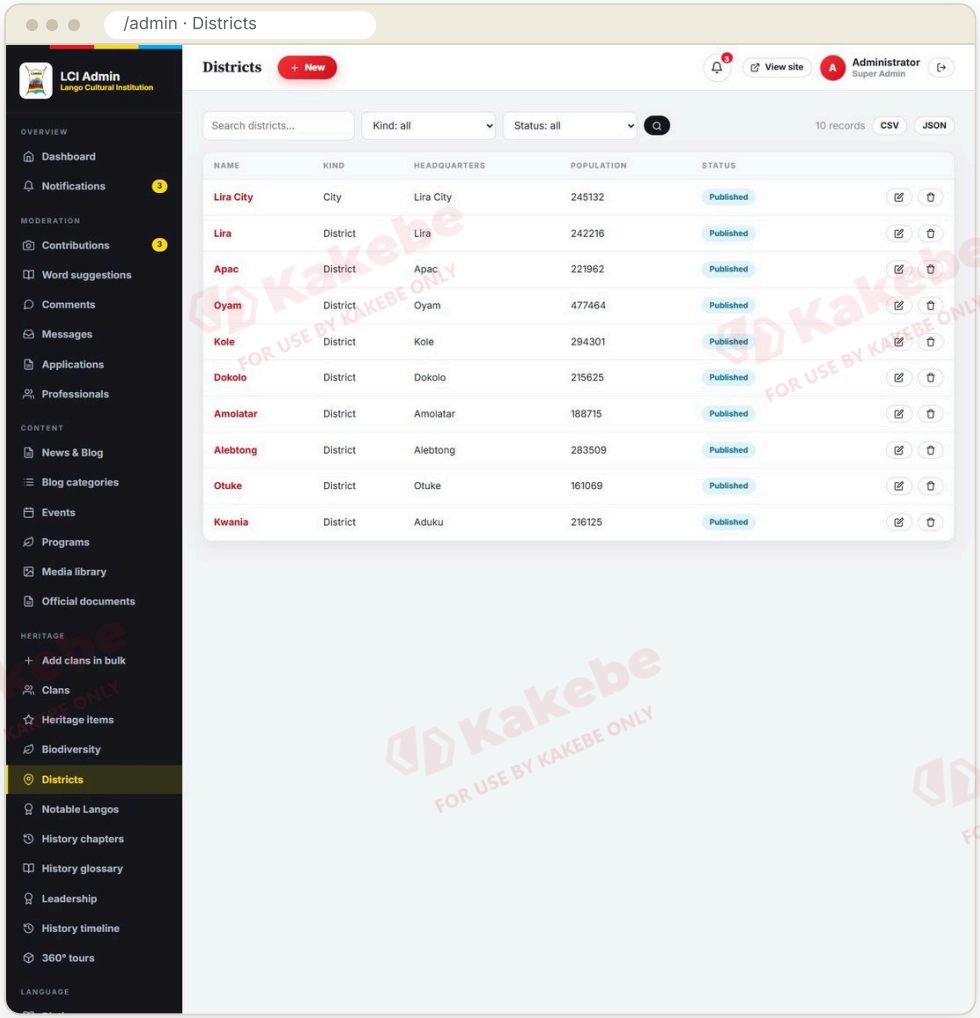

Interface translations (Leb Lango)

ADMIN CONTROL PANEL

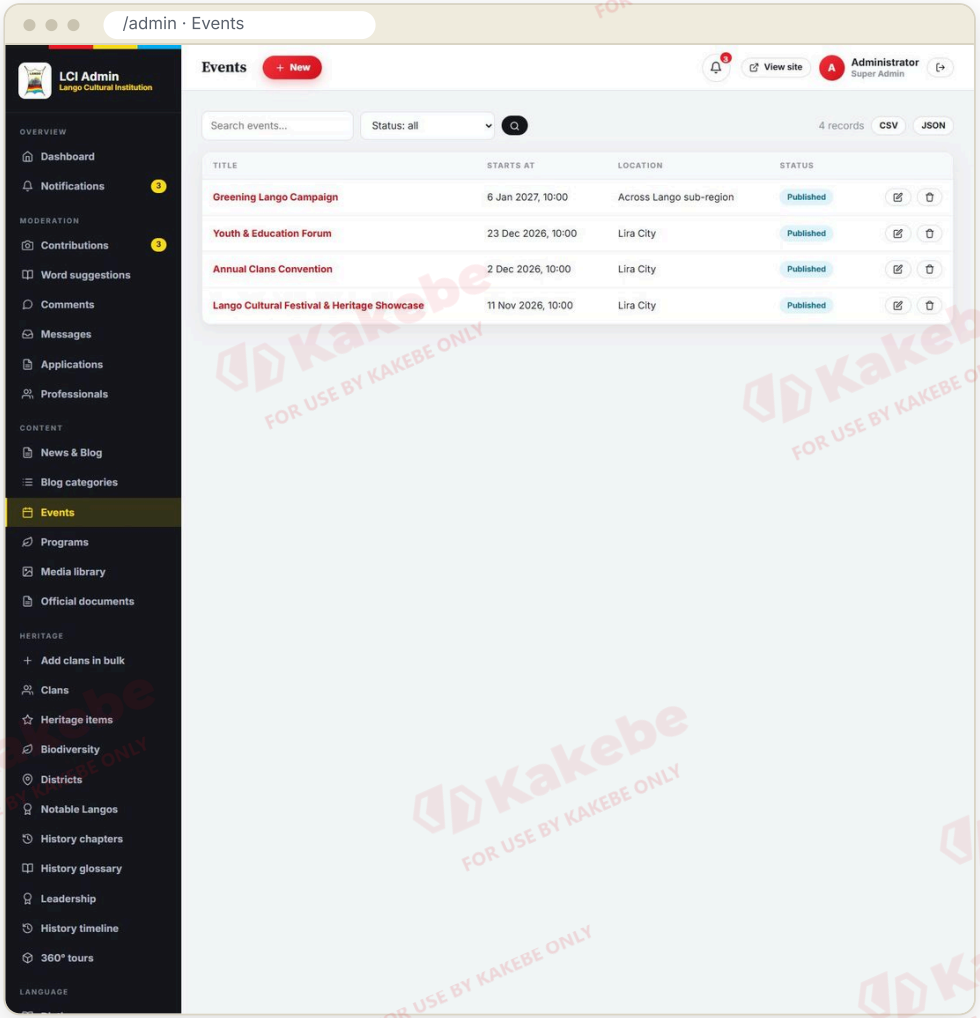

Content managers

Districts, history, notable Langos, news, events and programs are all edited the same way.

- Every content type: list, search, filters, create, edit, publish or keep as draft
- Bilingual fields (English and Leb Lango) where the site shows both
- Version history with one-click restore on any record

Districts

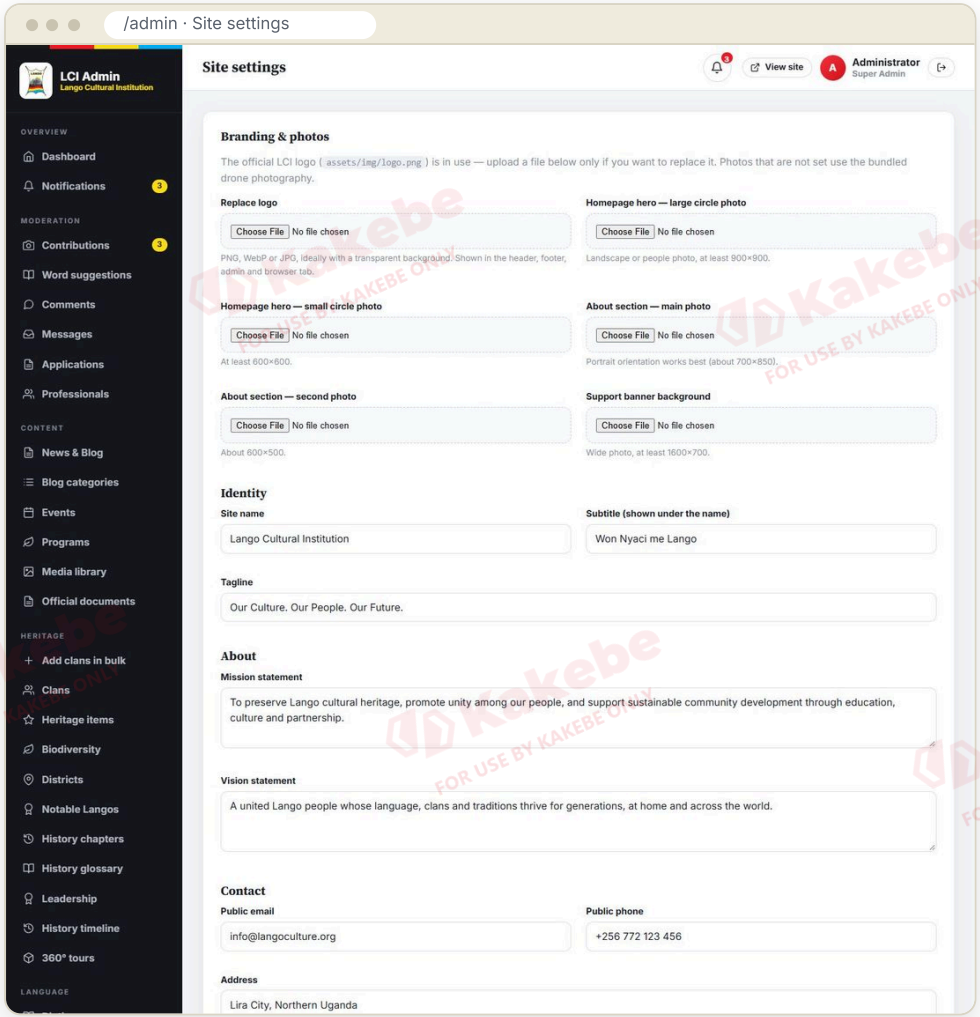

Events

ADMIN CONTROL PANEL

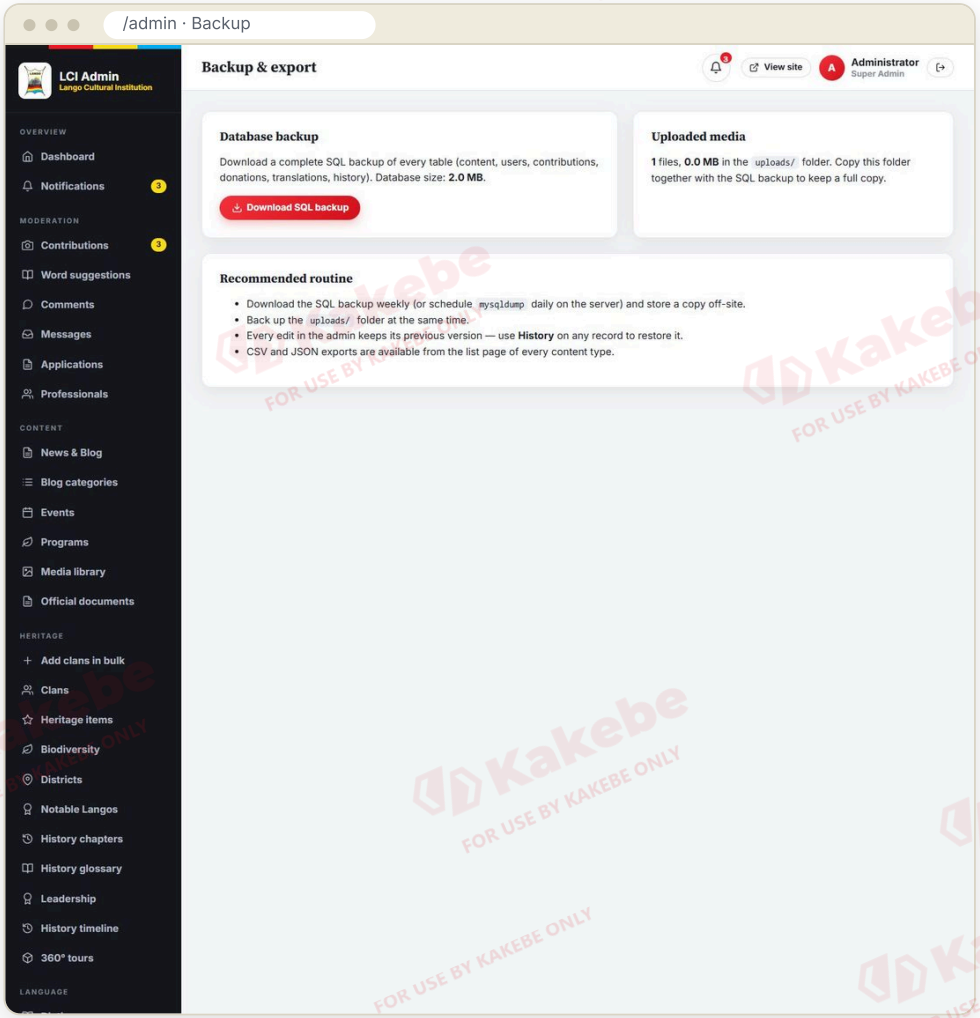

Site settings and backup

Branding, contact details and safe-keeping.

- Replace the logo, hero photos and support banner; edit identity, contact details and social links
- One-click database backup (.sql) plus CSV and JSON export on every list
- Audit log of sign-ins and review decisions

Site settings

Backup and export

WORKFLOW

A day in the admin panel

From sign-in to a published record, with a safety net underneath.

1

ADMIN

Sign in

Role-based access; a new password is required at first sign-in.

2

ADMIN

See what is new

The bell and the dashboard counters show what is waiting, live.

3

ADMIN

Open an item

Contributions, word suggestions, messages, applications, comments, professionals.

4

REVIEWER

Review and edit

A duplicate check warns when a word is already in the dictionary; reviewers can correct before approving.

5

REVIEWER

Decide

Approve, quick-add, ask for more information, or decline, with a note for the contributor.

6

SYSTEM

Publish

Live on the website, in the translator and in the app; points awarded; the member is notified.

7

ADMIN

Safety net

Version history with restore, an audit log, database backups and CSV or JSON exports.

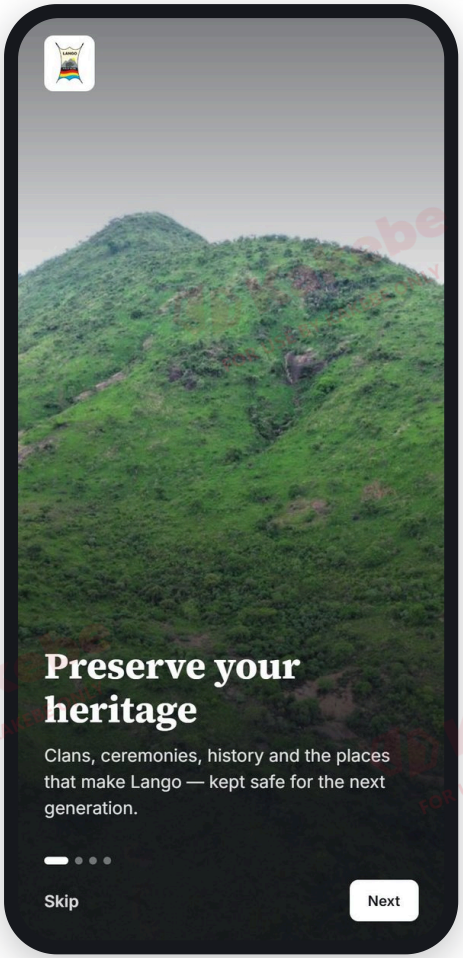

Admin staff Reviewer System

Kakebe FOR USE BY KAKEBE ONLY

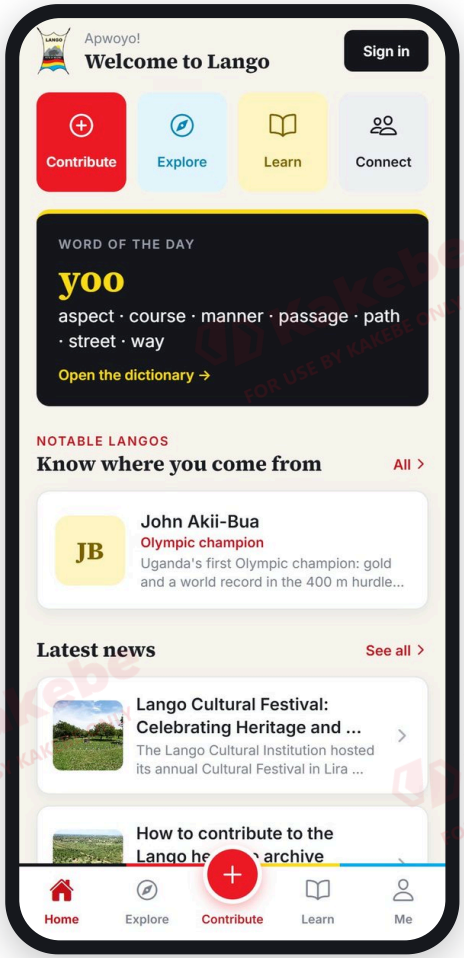

LANGO APP

First run, home and explore

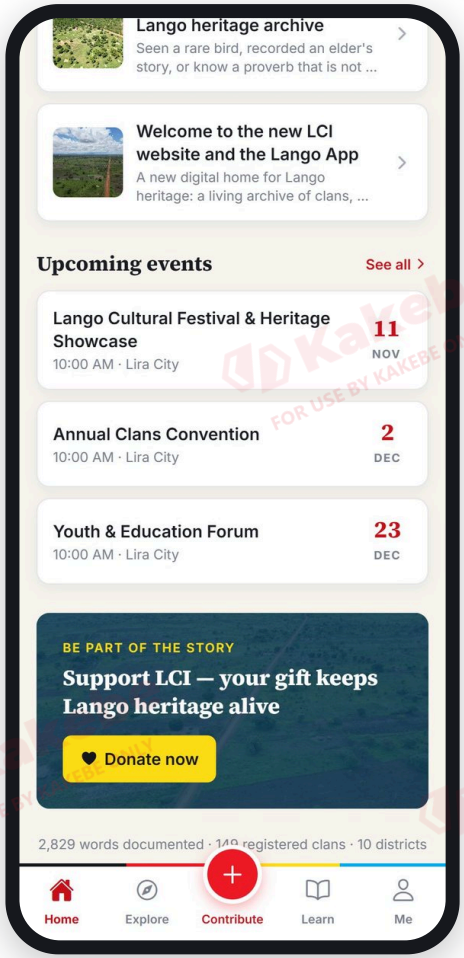

Built once with Expo and React Native for Android, iOS and the web, using LCI's own colours and the same typefaces as the website.

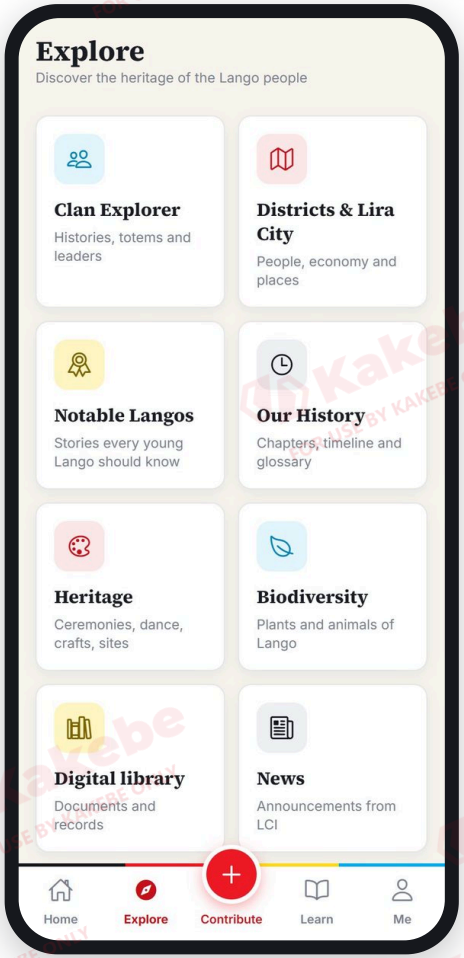

Welcome and language choice

Home: greeting, quick actions, word of the day

Home: events, news and a donation call

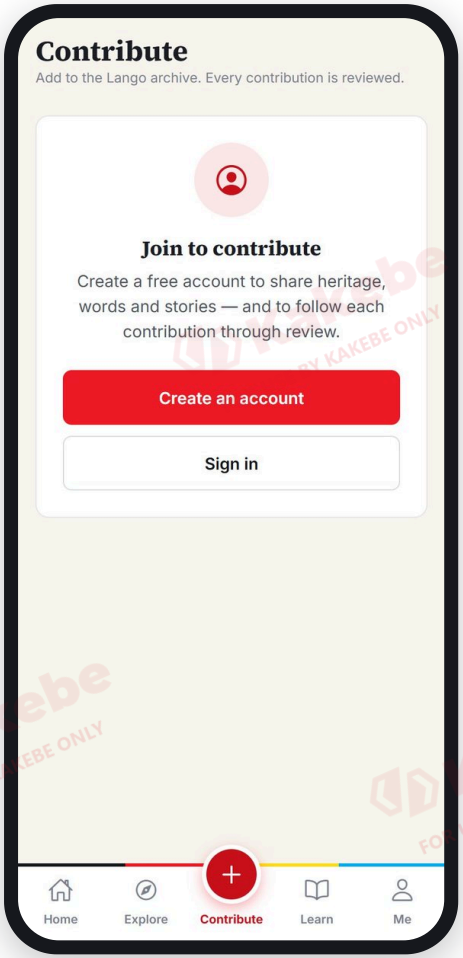

Explore the heritage of the Lango people

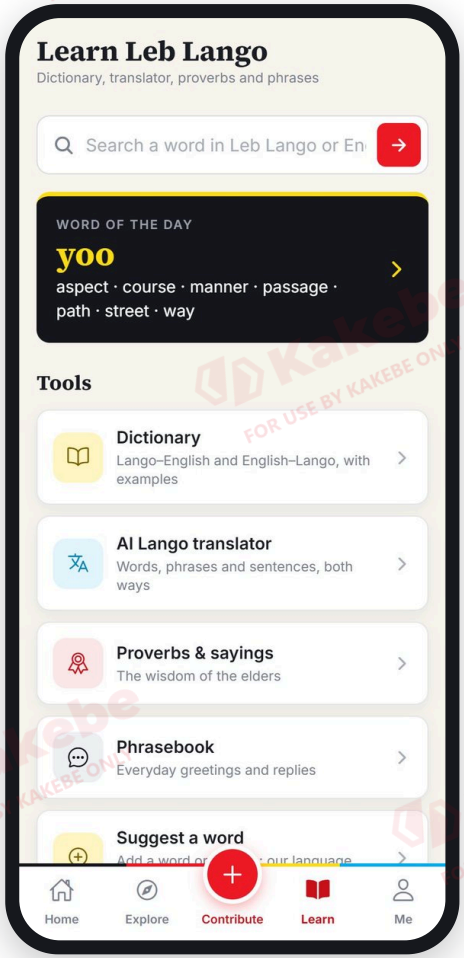

LANGO APP

Contribute and learn

Guided contribution forms, a dictionary that works offline and the AI translator.

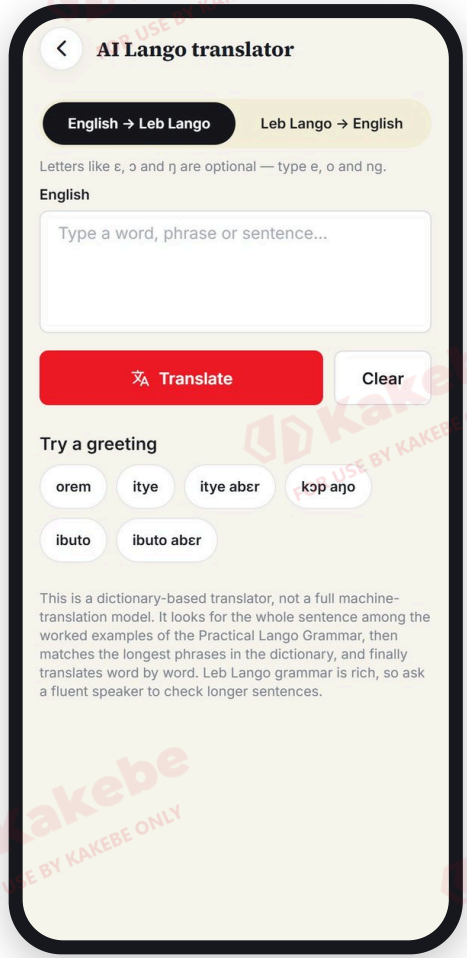

Contribute: join to share heritage, words and stories

Learn Leb Lango

Dictionary: both directions, A–Z

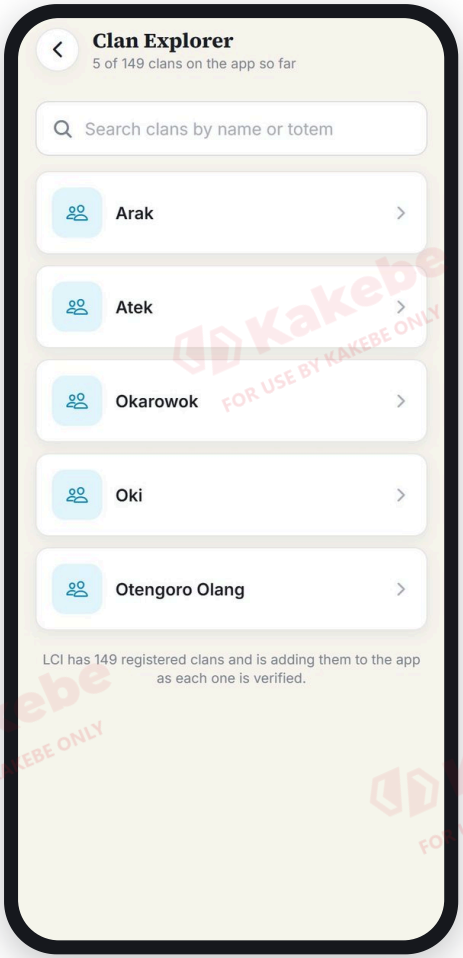

AI Lango translator

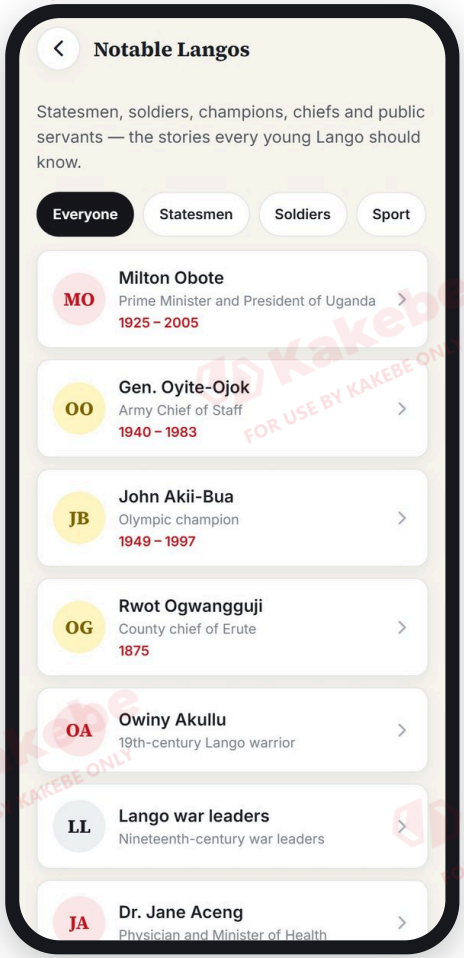

LANGO APP

Clans, people, events and support

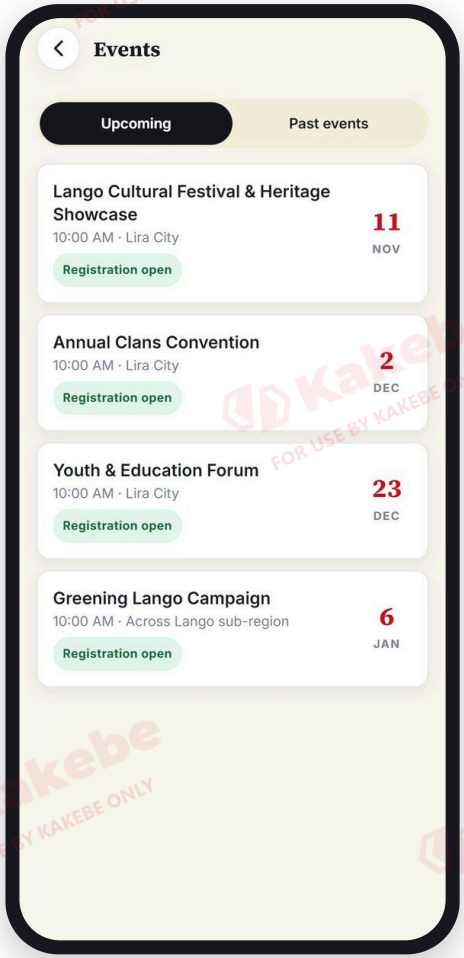

The same content as the website, laid out for a phone.

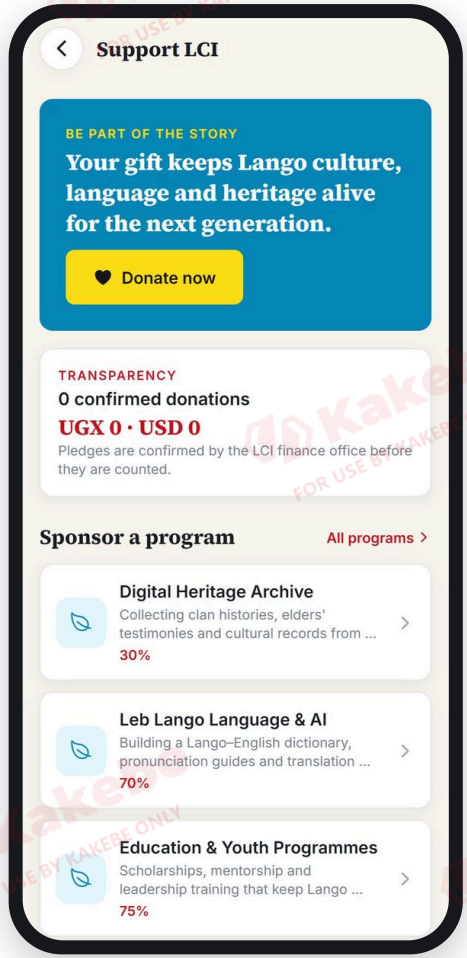

Clan Explorer

Notable Langos

Events with registration

Support LCI and sponsor a program

WORKFLOW

The app journey, online and offline

Designed for patchy connections: nothing a member writes is lost.

1

MEMBER

Welcome

Short introduction and a choice of English or Leb Lango. Browsing needs no account.

2

MEMBER

Join

Name, email or phone, password and clan. Signed in with a secure token.

3

MEMBER

Contribute

Guided form with camera, gallery, microphone, files and GPS.

4

SYSTEM

Send or queue

Online: sent at once. Offline: saved on the phone with its media and sent when the connection returns, never twice.

5

MEMBER

Follow and earn

Track status, get a push message, collect points and badges.

Works without internet

- Offline dictionary: all 2,829 words saved on the phone, searched in both directions
- Pages already opened stay available, and refresh quietly when back online
- Contributions waiting to send, with a banner showing the queue
- Tracking codes and event tickets saved on the device

Points, levels and badges

- Levels: Bronze (0–100), Silver (101–500), Gold (501–1,000), Platinum (1,001+)
- Badges: First contribution, 10 approved, Language champion, Conservation hero, Clan historian
- Leaderboard of top contributors
- Points are added when a reviewer approves

WHERE THINGS STAND

What is built, and what comes next

Honest about both: the platform works end to end today, and a few things depend on LCI content or the next phase of work.

Built and working

- Public website with English / Leb Lango framework
- Admin panel with roles, moderation, content managers, audit and backups
- Contribution engine with tracking codes and points
- Dictionary and AI translator, source-bound assistant
- Lango App (web app built; Android and iOS builds ready to produce through EAS)
- Offline dictionary and offline contribution queue
- Notifications: bell for admins, in-app and push hooks for members
- Open Data API

To be supplied by LCI

- The remaining clans: 5 are loaded of the 149 registered (names are never invented)
- Proverbs: none pre-loaded; the public form feeds the review queue
- Leb Lango interface translations, entered by language experts in Admin → Translations
- Licensed portraits for notable Langos
- Cabinet and elder details; real contact details
- News, event and program dates (current ones are samples)

Next engineering steps

- Payment gateway: mobile money, cards (donations are pledges today)
- Email sending for tickets and status updates
- SMS or one-time-code fallback for areas with little data
- Community forum and clan groups
- Maps and 360° tours inside the app
- Store builds and Firebase push set-up; go-live on HTTPS with scheduled backups

Kakebe FOR USE BY KAKEBE ONLY
